

AREA OF ASSESSMENT: Represent and interpret data. (NY 2.MD. 9-10)

Rubric	Trimester 1	Trimester 2	Trimester 3
4	Independently and consistently generates, reads, and interprets data including line plots, picture, and bar graphs, solves problems, and asks and answers questions using the information from these graphs.	Independently and consistently generates, reads, and interprets data including line plots, picture, and bar graphs, solves problems, and asks and answers questions using the information from these graphs.	Independently and consistently generates, reads, and interprets data including line plots, picture, and bar graphs, solves problems, and asks and answers questions using the information from these graphs.
3	Independently generates, reads, and interprets data including line plots, picture, and bar graphs, and solves problems using the information from these graphs.	Independently generates, reads, and interprets data including line plots, picture, and bar graphs, and solves problems using the information from these graphs.	Independently generates, reads, and interprets data including line plots, picture, and bar graphs, and solves problems using the information from these graphs.
2	With guidance and support, generates, reads, and interprets data including line plots, picture, and bar graphs, and solves problems using the information from these graphs.	With guidance and support, generates, reads, and interprets data including line plots, picture, and bar graphs, and solves problems using the information from these graphs.	With guidance and support, generates, reads, and interprets data including line plots, picture, and bar graphs, and solves problems using the information from these graphs.
1	With significant guidance and support, may be able to generate, read, and interpret data including line plots, picture, and bar graphs, and solve problems using the information from these graphs.	With significant guidance and support, may be able to generate, read, and interpret data including line plots, picture, and bar graphs, and solve problems using the information from these graphs.	With significant guidance and support, may be able to generate, read, and interpret data including line plots, picture, and bar graphs, and solve problems using the information from these graphs.
