

[Chronic Waste Diseases case found in Tunica County](#) March 4, 2023 Mississippi

WAPT

... a positive test of Chronic Wasting Disease was found for a hunter-harvested doe from Tunica County. This is the first CWD-positive detection for this county... detected across 10 counties in Mississippi ...

[Mississippi wildlife commission makes changes to CWD management](#) June 23, 2023

The Clarion-Ledger

... under the current management plan, hunters within the zones cannot provide supplemental feed for deer even if they're up to 50 miles away from a known CWD-positive deer. His proposal would reduce that supplemental feeding to 10 miles from a positive, give or take a few miles....
