

TumbleBooks is a great program available to Palmer River Elementary School as a member of the SAILS Library Network. TumbleBooks takes existing picture books and adds animations and sound effects to the illustrations, while reading the book to children. They've also begun building up a collection of chapter e-books that kids can read to themselves. Many of the books have games and activities designed to build literacy skills and check comprehension. The program can be accessed using these simple steps:

On mrpearse.us, there is a link to the library catalog under Research.

Once on the library website, the TumbleBooks link is at the top of the right column.
