EDUCATION

Georgia Institute of Technology

May 2024

Bachelor of Science in Computer Science

Atlanta, Georgia

- Relevant Coursework: Data Structures & Algorithms, Objects & Design, Media Device Architecture, Intro to User Interface Design, Educational Technology
- Concentrations: People and Media

WORK EXPERIENCE

ICF

June 2023 - August 2023

Web Development Intern

Remote

- Showcased exceptional communication skills while working with the Senior Vice President to successfully run the ICF Next ACT-IAC Partners program, showcasing the ability to work with senior stakeholders and contribute to organizational initiatives.
- Implemented Salesforce Task Application using Lightning Web Components, driving significant impact through streamlined task management, improved team productivity, and enhanced operational efficiency.
- Effectively communicated team needs and progress during daily standup meetings, ensuring smooth coordination and alignment among team members.

PROJECTS

Full-stack Application: User Management System

July 2023

- Developed and deployed a full-stack application using React for the front-end and Laravel for the back-end, showcasing proficiency in both technologies.
- Engineered secure user authentication, including login and registration functionality, utilizing API endpoints and account token management.
- Designed and built an admin panel with a responsive layout, incorporating React Rotor and navigation for seamless transitions between sections.
- Leveraged React Hooks, Context API, and Laravel's CRUD operations to enable dynamic user management, including adding, editing, and deleting users.

GT Food Finder

January 2023 - May 2023

- Distinguished as a top design among 15 competing teams, GT Food Finder showcased exemplary user interface elements, making a significant impact on the university and users by delivering an exceptional front-end design.
- Conducted 8 interviews and 6 contextual inquiries, employing user-centered design techniques and human-computer interaction concepts to drive the implementation of GT Food Finder, resulting in an exceptional user experience using Miro and Figma.

ICF Website Experience Enhancement

January 2023

- Seamlessly integrated additional events by leveraging dynamic loops and nested data structures, enhancing the website's functionality and providing a seamless user experience.
- Applied data fetching capabilities of Next.js to optimize page loading speed and enhance data retrieval for dynamic content, resulting in a smooth browsing experience for users.
- Produced visually appealing UI components using React and SCSS, creating an intuitive interface that captivated clients and enhanced user interaction with the website.
