

Next subject as we stay on top of this!
#Save lives but who comes first!

Why do we do what we do, because we are a resultant of our experiences and that is a known of many! The effects we leave on life, can become aware to us, w/the right understanding! I show the movie link of `Aluna below, as an eye opener to me and many live w/this awareness, yet you don't find them in the cities? They are enjoying living w/nature!

Thankyou Jose as he corrects! Is it an eye opener, because when I've worked hard at transitioning our 2 cents to help the bigger picture, I see how when you don't live within the entire habitat that gives you the water from the mountain tops to the sea and all in between and work these lands for it's offerings, we then fragment as in our local plans! Seeing many do as pieces of plans happen, leaving many important missing worn torn links, that `Aluna is sweet to share their message to the world! Which I thank!

See the 3 day summit w/Dr. Paul Thomas, get rid of your fear, and learn how to mindfully respond to this winter virus! Please all, prioritize old, infants and ill w/high risk common sense and wear a mask, if healthy take off your mask + go back to work, get some exercise, this is just a winter virus at it's for Northern Hemisphere accept for those areas started late, and S on notice it then will come your way! Learn what to do now! The media and Govs are not on top of it!

<https://healthfreedomsummit.mykajabi.com/>

I've shared this w/a few on YouTube until they stopped me. But I understand if I yet to know all their rules or policies which I do want to respect, in case they just don't allow repeated postings as I did here, to simply share!

Also for those that don't want to sign in above, please see YouTube's offerings of Dr. Judy Mikovits, that deserves everyone's support and Gov's should make these wrongs right, so please do your part and share; <https://www.youtube.com/watch?v=dOUtrI40HSY>

5.2.2020

`i come to talk story1 second ago

Thank you!

We suggest all educating oneself, or if skilled share, w/what you are part of as an earthling at this time! As you can do more to understand and end misinformation, as we all continue to do! Yes, to be ill is not nice for no one, and infants, elderly and ill are most at risk, w/COVID 19. I've had personal experience w/a neighbor having family ill and one thought it was the worst flu ever, and this was a

Dr. Please if you care for them or ill yourself, then use good skills to protect them!

The world has had and still has, many isolated w/out being educated to maintain good health, nor support, leaving many ill on earth now! As well you people on your continent have conflict w/neighbors and many are ill and dying prematurely!

Now is your time to mindfully act, please see some skilled people that I respect to share the truth, so you can do your part to learn-share and help yourself-your communities-your Govs make mindful decisions.

Please see Dr. Paul who has done a lot of good work as a pediatrician, as well working w/many addicts, for if you even know the statistics in US as well on earth of people suffering, addicted, suicides and many left unsupported that we continue to do our best to help, I think you would rethink and part-time is all it takes to become aware and then act to help us all working to end these scars forever! Not repeat them!

Dr. Paul and I do not agree with vaccines the way people are promoting one for COVID 19. Dr. Paul has a way that he has perfected to be a friendly vaccine for special purposes. We suggest this weekend to see the round table discussion, and Dr. Paul explains this well;

Encore weekend is live now! The Truth About Vaccines 2020 with the two new episodes 8 & 9;
<https://go2.thetruthaboutvaccines.com/docuseries/replay/?>

Sign up for free and watch each day of those episodes for the day! Or you can purchase the tapes if you don't have time?

Have you wondered why the second richest man in the world, Bill Gates, has a seat at the media table where he has self-proclaimed HIMSELF, to be a world expert on vaccines? Does what you see on TV match what is actually going on in your world? Did you know Mr. Gates (oh – he's not a doctor!) participated in "war games" pandemic preparedness games and predicted a pandemic? Are you a profit, if you plan something, predict it, and then carry out your plan? Or is that something else ...?

Have you noticed the media has abandoned all caution when it comes to vaccine safety? I just heard a plan to vaccinate all

300,000,000 Americans and one expert wondering what would happen if 1/3 rd or 100 million were to die? There will be no liability for those who perpetrate this disaster because it was "necessary" due to the State of Emergency! They will claim they had no idea.

THEY HAVE NO IDEA!

You cannot develop a vaccine to this kind of virus and safety test it long-term without safety testing it long-term! Long term needs to be years not months, and there needs to be a saline placebo arm to the trials, and they need to look at all health outcomes. It does us no good if there are fewer deaths from COVID, but 1/3 of those vaccinated die from other causes.

Have you seen Bill Gates' new announcement that he'd like to see all children receive the upcoming COVID-19 vaccine, not to mention the seven billion occupants of our planet? Have you heard the new interview with our friend, Dr. Judy Mikovitz, who worked alongside Dr. Fauci for many years, as she blows the lid off of what's really going on?

I was a major part of the Series "The Truth About Vaccines" which comprises the first 7 episodes, but this 2020 release has two bonus videos you simply must see episodes 8 and 9).

Right now, this weekend only is a free encore event for the whole series. Watch these last two episodes (and the whole series if you can) here.

Please watch the last two episodes. Our freedom depends on it.

To Your Health,

Dr. Paul Thomas

This is his friendly vaccine plan, compare w/what you did or thinking of doing;

https://www.integrativepediatricsonline.com/uploads/1/0/9/2/109222957/the_vaccine-friendly_plan.pdf

And see his Covid 19 ebook;

https://www.click.drpaulapproved.com/free-covid-19-ebook?utm_content=10778624&utm_medium=Email&utm_name=Id&utm_source=Actionetics&utm_term=Email

<><>

We have not been told the truth in the US from skilled positions in WHO-CDC-Dr. Anthony Fauci and more past Govs, misguiding Govs now, that should not have unskilled in those positions! It takes us all to make 1 universal science of common sense, so please do your part to make your decision on if you want this to happen to you, or to other earthlings where their Gov may not be as aware as some that do get it!

Dr. Rashid Buttar also took part in this series, above:
https://www.youtube.com/watch?v=uVPvv_5UISU

Join in where can and please check back for updates, as we welcome you to our virtual platform as we transition, sharing Humanity's solutions, once all organized to link! Our plans are to scale earth-space to rid toxic, as we prioritize where and what local plans to focus on negatively affecting most species including Humans, research if needed, and resolve w/good investments! Also, we are scaling earth w/agroecology working w/skilled stewards still living ways that work! No more can we just live local, rather there is no better peace plan, education, or tourism to explore earth-space than to gain this understanding and find your place to mindfully act and enjoy!

Welcome your skilled students to use your communities as extended or only classrooms, as together we network and share what works!

Peace is real once we all get on the same page w/neighbors sharing 1 universal science, so all give-gain support, for all to understand what it takes to have ecological enhanced sustaining healthy working communities! We believe it starts by balancing the genetic biodiversity to link w/neighbors, for this is our true sustaining energy!

Love, kara speaking for our combined `effects..

<><>><>

Why when so interdependent on our habitat's microcosm for our gut to fuel our ability to think, says **`Functional Medicine's new biology as w/Sayer Ji's** research and much sharing, as I speak below in the Sanctions focus. That wheat is not healthy nor nonorganic corn or soybean which many have w/the Industrial Agriculture, which yes will come down!

So why do you not look at the good side of all this, please?

Do you realize all the scars on earth that Humanity-species has lived through and died through? I'd like to see us all enjoy life as I do every day, as no one can prevent me from booning w/life now on earth when soil is below my feet and or w/the universes, if you use or learn common sense as I try to every day! It is a flow to remain in, and sure I am not saying I have a corner on the market for I too fck up and stress out working hard, but I work at it each day! Good Ex; Whether I walk in nature or drive from store, I stop for those few moments alongside the road to look at the sun glistening on the river or the clouds in the sky or a beautiful fungus on a tree as I watch it grow, flowers I get excited to wait for each year, etc.!

This 6ft apart can only amaze me in the store w/tape on the floor separating us, when one gets so afraid and wants people to stay behind the tape, then to think ok if the virus stays in the air for 72 hrs and we move to position 6 ft up, then what? Same if I look at **Mike Adams posts**, I link below, he also is showing how people w/COVID 19 are having it, tested tht it is gone and then 35-45 or so days get it again! As well on **Functional Medicines site**, Drs are continuing to speak on this, as they propose that perhaps young and healthy people get it severely if received a big dose of it right on!

Meanwhile my man had ended up in the hospital from an accident, and when I signed in for him as he was in ER, the staff told me when I asked why would you ask if he would not agree to test for virus and she said too many do not want to know so they don't get tested when come into the hospital. Meanwhile I had a discussion w/them as an elderly lady comes in coughing w/pneumonia in a wheelchair and staff has no gloves on sharing my paper work also with hers back and forth, so we do have to beware when others miss the point of what one can pass on and how one can carry it to another when ill with it or not?? Sorry If I repeated this, but it still happens!

If you have a chance today, 4.29.2020 and tomorrow do see free the last 2 days of the Vaccine series or buy them supporting the mission to get the word out!

WHO and CDC are lying and that is a crime against Humanity;

https://go2.thetruthaboutvaccines.com/docuseries/episode-8/?utm_campaign=ttav&utm_medium=email&utm_source=ttav-2020-optins&utm_term=Email

Please see **Dr. Paul Thomas's offerings to update all;**

https://www.click.drpaulapproved.com/free-covid-19-ebook?utm_content=10778624&utm_medium=Email&utm_name=Id&utm_source=Actionetics&utm_term=Email

Ok before I continue what I shared below to many, I do hope you check back for updates and comments and give your rebuttal or tell me where I'm wrong, please! I want to add another comment to me personally after they read below, I will respect their privacy and give you a gest of what it was about for you to add your take in comment;

I respect this person's skills, and she feels I should support GMO, help make them right, she said it was a sad story of what happened to golden rice. It could've fed the world with beta carotene until Greenpeace stopped it just to save a few small farmers. That to me was pretty tragic given the research that went into it and the world hunger that it could stop. So I disagree there.

She stated; I'm saying on-purpose politically triggering words that were at times incorrect, and I don't feel I'm doing that, that is why we are structuring a platform sharing other's skills with people I respect!

Also she says; Why do you want to end the sanctions? There was someone like that on my feed in my neighborhood. They said it didn't matter - only 1-2% get ill, but what's 1-2% of almost 8 billion? It's about the same amount as the spanish flu levels. Like only if it makes sense. And no, I think we should rethink the economy before we bum rush back into the scheme of everything - because our economy just doesn't work if it gets wiped out by plagues.

I explain my rebuttal to sanctions to her below, after I share more of her thoughts! But for one, I'm seeing so much science math wrong, especially in the vaccine series I share below of bad testing! She feels like I sound aged in those moments. She is 28 and tries to speak reality about millennials and respectfully cares for her parents that are up there in age! So I take her comment to heart and rethink w/them, for she too wants to make good change in the world!

She believes in indoor, soil-less vertical farming (and GMO is fine, just breeding plants to fit into them the best way) to sustain the world. Our agriculture should interact with the outside world - it's not good for us nor the environment. I don't believe in growing outdoors - as nature should create its own ecosystem. If I eat food from outdoors, I could possibly accidentally eat bugs - or take away their food source. I mean, live and let live - there's no bugs in a hydroponic garden (I had one, so I know), except if the plants came from the outdoors.

<https://www.youtube.com/watch?v=ESuzrY2abAw>

Hope that all helps!

Kara's response;

I like your truth, that is why I share it too, so you know me! That is why I love you, not because I think you are right!

I do feel if more could have an honest conversation like you and I, at this time we would not be wasting time talking about these issues that are leaving negative effects big time on life that sustains Humans and Humans due to lack of good education or real hands-on experiencing

past down, rather many left in controversy, as we are here! Rather we could be creating resolving much dysfunction, which I feel we both will continue to do! whether apart or together?

I never would want to hold you back, for I can identify with you! Early on I would study and then think I knew and applied, then to see a negative effect from me and many! How many, is out of my scope to honestly relate to your questions? And that is something we both could learn from!

I know in starting to watch your video, which I thank you for, I would be spending time I don't have now sharing what I would need to know more! But I start w/no way could I surround myself w/metal energy! Plus I see all the good agroecology does to heal reality now, not add more negative energy continuing parts of what created it! Simply meaning watershed areas for weather-microcosms balanced sharing the genetic biodiversity our internal and external microcosms require to link as neighbors I suggest can and some do and more need to link this balance once communities work together to balance them!

That takes communication to understand when so many of us are uneducated into the connectivity and reality of what truly sustains us now on earth, when so many in different modes need healing?

I know I respect Functional Medicine due to the few I've followed, have healed themselves after years of working w/pharma, as Drs-researchers-family-people watching self or others decompose, knowing well after healed, how and why?? As well as not blaming but feel western medicine needs to change curriculum, and go back to school! As many now as well in the past have always added other cultural medicines to succeed in their understanding to heal themselves and others! So that mode started Functional Medicine 100 years or so ago, not started w/the name, but the function of it treated epileptic seizures, etc.

But do I agree, not w/some, but yes some you have innovative ideas to investigate, but out of my scope! Plus I respect you for studying and then trying to apply, where I studied and said this doesn't make sense or see the reality of others ill from it, or I quit as I co_evolved w/my experiences in my isolations at each time! I really wanted to learn but from people that lived it, not lost in information!

I do not like how you assume I may have nothing better to do, that is a negative of you not knowing me, it would be interesting to understand why you would say that? I can only answer the way I did, and suggest you don't carry this type of assumption throughout other needs of

yours to make good judgments on, for that is not me! I do what I do for I think all if do their part daily meaning whoever crosses your path part-time, you give-gain support for them as well! Otherwise the whole ideology of doing what we think is right, maybe best for another planet!

For to live on earth, I need to ground w/the soil below my feet, knowing those organisms prevent pests-pollinate foods-clean the air-soil-water and this list too is long! I like being an earthing, actually all my life I adapted to not allowing not knowing to bother me, yet I knew what I knew and what I didn't would come, so I'm the type to take responsibility for myself, and plan to continue that! For I feel unless we all do that, one is only kidding themselves! Yes, we are all one, but only when we make ourselves whole! Then we can listen and accept new info-debates wanting to know more!

Everything you ever shared w/me I learned something, but never do I just accept anything totally until I have to experience w/it, for what you know is your experience and I have no clue how you isolated that or not? Not because of who you are but because you are also an earthling and I don't live in your shoes, and actually I like to go barefoot on soil! As well we always make sure our children are raised playing in it to interact w/the microcosms needs and offerings, for nothing on earth is in natural balance says studies I respect, even though we can think it is w/our isolated vision and experience, and I thought `Aluna video is a good Ex; of how we splurt out what we think one should do, then to realize not even on the same plane and needs more communication for understanding!

I see no other way to be grounded on the earth than through the soil, creating a life balance to me is the way of humanity's survival! I love bugs and respect those that know a lot more of them than I do! Knowing there is no pest, we create them to multiply by giving them homes they like from our bad habits! So in vertical farming how can all this happen? How can all these people skilled w/permaculture-natural building-rooted in agroecology still living it as good stewards be wrong, when it works! And they too now realize nutrition we all learned is wrong and these grains and monocultures are not the way to go! And sure many ill now healing should not have to be the way we learn! As w/Functional medicine continues to see it every day!

But yes even you and I in our brief experiences being alive, compared to the many before us carrying lessons that work thru today, need to be examined, for what you say may have pieces as we all do, that work, and yes if we all sort it out when applying using what can, then I feel efficiency can happen, and that is the message I'd like your help with!

I've worked this virtual platform for over 50 years learning-sharing-correcting myself, to get to know, and I don't plan on quitting this process, for much more I feel is being done by much more skilled than you and I! And I'd like to build this medium to share more! Sure there can be a subject for innovation to be depicted or for another planet, but I'd like all to part-time focus w/us to prioritize toxically and restore what is known to work and create upon it!

To me, that is people that know microcosms and how best to take Industrialized toxic and transition, individualizing so all life is reborn for that ecosystem's connectivity to make it balanced to then share the genetic biodiversity w/neighbors, for earth has a circulating cycle far beyond what you and I may think, that has worked, where Human's isolated perceptions of fragments have seriously left such toxic, and that is why I feel w/all putting out heads together can seriously make a change, for what we as Humans have done wrong, sure has killed much life that never should have died, nor left suffering!

we can't bite our elbows nor should we waste time trying! But we can realize the greatness these cycles also give us daily and rethink all this, working w/it, for the earth will take care of itself, whether it destroys us all in the process or not, is our choice to give-gain support for all to better understand what each can do for self and then w/each other!

I prefer to make this structure to have such conversations if needed, but not to interfere in those that know! That is why I share w/those I do, including you! For we know how to say we were wrong and correct or co_evolve taking the time to listen to the other!

I have no interest in pharmaceuticals or the study, yes for ER and I'm not condemning all, as many good people also in it are trying to change it, and they are more skilled than I! Same in every field of science or medicine or any, as far as that goes! Too many of us have been isolated perhaps, and only each can answer that, once we try to share real experiences that work, so we each can self reflect and edit? It appears many yet to live knowing the negative results we leave, or contribute to unknowingly, on other life on earth, including the lobbyist and profiteers!

GMO's, I will never support until they change their negative effects, nor do I respect the OR legislators take, and others I've seen on labeling, when yet that would of saved a lot of resources, just by saying one does not use them, vs the waste US Gov does! Same how distributors control the use of seeds to farmers, where I support seed exchanges and indigenous ways that contribute to good work over the years w/their seeds as well care for habitats w/ good stewardship! The habitat destruction growing GMOs in monocultures by all has

to stop, this list is long! Physicist Vandana Shiva, I am not saying I like all she does, but she has done a lot for Indian farmers. More skilled than I!

Amazon is a good Ex; of deforestation planting monocultures and more, unaware of how Corps gain permits wrongly to interfere in the connectivity required of ecosystems that create the biome(s) needs for balance! Meanwhile, those who live there get cut off from a total balance they sustained from! Back again `Aluna video shows that easily when yet many of us learn or after several years of misuse-abuse, awaken to this reality of why we are so depleted in micronutrients, etc!

So to me, the questions should be more like on our platform, ok in our collective local plans to define that leave most negative effects on life, how do we reconnect? Can Humanity see our participation in the developments, so we can subsidize this transition, so restoration can decentralize w/localized systems of low impact, not falsely use large grids of alternative energy ecologically interfering more, as if they work when parts of many are traveling around the planet for other than locals to profit!

Can the rivers again flow from the mountains to all life in between including on to the marine life that too requires it! Same the ancient transboundary migration paths restored to bring back that life's help as communities regain reality of this restoration required! Then to have agroecologists assess w/natural building that has worked from the beginning as good minds continue to create good technology in the synergy of what we say and more to guide us! For earthlings cannot survive healthy working communities without this in the balance! Those are my experiences that I want to support!

I don't pretend to know, but when I've traveled a lot in the world, many around me as activists, I've learned more from, as well as seeing the ill states first hand from me thinking I new w/my limitations allowing others to misinform, in a class yet I expected them to know!! Same w/sanctions, that I brought up this last time not because I'm skilled in it, but because of the lack of awareness of communicating to each other, and how we contribute not knowing, and then become dependent on stuff afar, vs create ones owns sustainability w/neighbors as I suggest in our platform as we transition seeing more of what works w/real hands-on that live it! Vs bitch when can't get it from afar, the whole story to me is inefficient and a waste of human resources on all sides!

I hope you never see the negative realities I've seen, yet I've not even come close to the many visions I've had of the reality of war, early on and still, or great pandemics of millions dying! I feel we all can do our part to develop this structure to stop these scars, as we link, vs repeat what others are doing better, rather we connect w/them!

I wish you total harmony to make your own decisions, but never will I support any of the above that my experiences have proven negative, until a decent conversation between sides offers more respect and clarity w/proof of good science data and math! For now, each subject we all bring up, once organized, people will perceive or correct us and that is the transparency I would like us all to continue! So together we focus directly, not just be a catalog or archive of more stuff!

I want our youth and child unnurtured in adult bodies to co_evolve as each redirects oneself! And we can know our wrongdoings, gain understanding to help, as well our appreciation for all to take part, as now we transition sharing Humanity's ways, I'm confident that work, efficiently, until they tell me there is one better to guide!

That is the respect I have for you!

love, kara

><<><><><><><>

Same w/proposed vaccine, which I never would take any, nor was I aware of when my children were young and gave it to them, due to Drs stating that was needed back several years ago, and some still do! But if you watch the vaccine series now, it made me cry, to see how this history of vaccines has been and is so toxic. This series is free as you watch video each day, or buy, and today 4.26.2020 it is on day 5 of 9, you have to sign in;

https://go2.thetruthaboutvaccines.com/docuseries/episode-5/?utm_campaign=ttav&utm_medium=email&utm_source=ttav-2020-optins&

Same as I've shared before if go to **Healthtalk calendar** you can then see the many subjects of video series shared fear or buy, of Functional Medicine;

<https://healthtalkonline.com/event-calendar#calendar2>

Today please see Josh del Sols offerings of 5G and what we can do;

<http://takebackyourpower.activehosted.com/index.php?action=social&chash=eecca5b6365d9607ee5a9d336962c534.2711&nosoci>

Sure I wear a mask when I'm ill, or around ill, as well as respect the law until together all can change what is needed! And try to be respectful and be careful, but this is really hard as we as Humans are a living organism and do well w/nature when we enhance, and that is the problem, many of us have yet to be mindful of our true connectedness that sustains our internal and external microcosms!

If one is in range of such ill people-species in quantities, if living a flowing balanced life w/energy prioritized, then our microcosms have no problem doing what is needed! But look at how long many of us have lived having no clue of this total harmony required, as in when we've chased our head or stressed our bodies, etc.! As I see people don't connect, it is out of the norm, we get in our own way!!

As in some behaviors of germs living longer in the air, on materials, etc, and our microcosms subjected for longer periods do wear done?? I've tried over the years when helping ill family, I cook and easy to put fingers in my mouth! As well to sleep w/a mask or wear when near ill, it is hard to truly filter out over time, and that is why shared though and acts are needed to help ill, so we don't do as I experienced, spent months doing great work, yet to carry a bug I thought that would of been long gone months before, but when wear self out, we pay the prices or pass it on to others more ill!

I shared **Dr Jessica Green's experience, as a microbiologist** before as she literally chose a hospital w/her architect students, and she locked herself in a room w/the ventilation systems being very toxic and she got really sick! The statistics are high w/people getting more ill from being in a hospital. But she also developed a laser to show a photo of color coded different germs in one's house, on chairs, in corners, as she had several varieties in one room! As well Humans should live with inside air the same as outside if not toxic!

I even long ago told NASA that had a visitor type center exhibit in a Mall that was crazy in Titusville, FL! It gets very humid there and seniors and disabled would go walk in the Mall, being air conditioned, meanwhile a leaky ceiling w/mold! Yet NASA could only think of space exploration. I share this due to us as Humans are out there, many of us living in the fog, taking it as normal! So like the `Aluna movie, I just had to laugh for it is so true how we just throw it out, thinking what one should do, then to see them come back, stating, we need to be more clear, so these Ex's I think can help us get real w/focused how tos! And those of you in ecology-conservation-microbiology-entomology-soil and composting, need to rethink a priority list! Like how Sadhguru says, I repeat, `We did not come in with a manual, but he created a `inner engineering course and has very skilled yogi teachers. But I say we can get our minds in tack as well our bodies, and Sadhguru these people can help you understand some missing links, as well you them, as we piece this together, please!!

Meanwhile in our travels we've seen many unaware of how some house materials cannot get damp, same not good to have piles of damp clothes then put them on the next day, or no good ventilation in house cracking windows on each end, or no curtains opened to let the sun come

in, same never taking airing out quilts or good washing habits, etc.. We shared this study as well w/a Traditional Chinese-American Medical book in Solomon Islands, when we sailed in and they were trying to work at ending Malaria. Meanwhile trying to help people be aware of how to rid mosquitoes. None of this info is new, yet why people have not prioritized sharing it, when they people have resources to explore outer space when yet life on earth dies prematurely and so many suffer, this I don't understand! Lovee was fortunate w/some experiences as a child in RU living close to scientists raising fish species that eat larvae, preventing mosquitoes from spreading, sending them to Africans to put in their waterways!

We Humans unaware for many years, then become aware of some things, do want to prevent more from remaining isolated, as same scars repeatedly occur, and at an earth-space level our transitioning of our virtual platform, hopes w/your help to perfect this platform to end these scars for ever! Whether life on earth ends tomorrow or we restore what is needed, to me it feels good to be working at it! For no way do I assume to know when it will end, for all, until we link personal experiences, so together we share, so those that can help!

Our plans welcome all, to entice you to rethink and create w/your skills more as we scale these acts to convert every negative link as we take responsibility for oneself and others, locally and afar! Giving us energy to do exchanges that as **Sayer Ji speaks of w/new biology is following ancient ways**; [GreenMedInfo - The World's Natural Health Resource | GreenMedInfo](#)

W/our food, our soil to grow our food, our water to be clean, pests to not get out of control as many create a cosy space for them to propagate, for the genetic biodiversity to become balanced to then link w/neighbors, yet many don't learn this early on! Why or is it important to know why, lets just take advantage of the many indigenous still living these ways in patches around the planet that are willing to guide us!

Emeritus Prof Miguel Altieri created an agroecology curriculum, and his wife Dr. Clara Nicholls along w/SOCLA are these people to guide us! And we want to aid this scaling throughout earth as all join in!

For many live this way and do share and have from the beginning, as in the **Russian communities in the countryside** where it was known to just show up at dinner time to be welcomed in to have a nice meal, good night sleep, knowing well one would give an exchange if could! And when everyone in the community would take turns, people would heal or find one's place in the exchanges made!! So let's look at this distress and get real that we don't want to go back to normal, when so much is wrong!

Let's monitor this energy exchange, change the verbiage of priority, from you all very skilled in this! We can cut through the controversy of what is needed for this complex life that sustains Humanity, and how most efficiently to save this life and how best to share it w/all! You can communicate w/each other, I see you do it well w/many, so please if we focus direct this conversation then we can learn if we keep it simple for a child to learn!

Let's take a review of Humanity's solutions, please! As **Dr. Caldicott states how WHO made a mistake and deserves help** to make it right! Same I think we should follow through and respect Pres Trump's position and every leader and talk to them directly! Or co_evolve Gov policies as responsible positions are not listening to reps for communities! As we reach out to others as well that may have controversy over others work, yet that have done great mapping or skilled fragments to draw from, so no more when we speak of doing our collective plan I share below, or anyone's local plan, do we not think of attaching it to our living earth, not isolating it to then soon die off! Or become dependent on aid afar! This must end, as we open to our neighbors!

The story of `Aluna is something that can stick in your head, that I choose for this reason. And if you take the time to watch it w/friends, you will see how at first they expect all to know what they do, then to realize what they explained was not clear enough so then they decided to make it clear! Just like maybe you skilled have thought before you learned that many of us have no upbringing, when spoiled w/a toilet and toilet paper, grocery stores, maybe a farm truck of fresh goods once in a while if lucky! Meanwhile the earth is filled w/unique skilled stories of what used to be and some are still doing. I loved the old abandoned Chinese farm houses, where a history of new family members takes over once another dies or before sharing, using the same bowls, etc.. Can you imagine all the energy saved as many of us chased our heads going from 1 house to another, having to have your own? When these families even in Solomon island when weaving w/grasses well, would last for 10 years, and when a new family member came aboard they weaved another wall!

I share this story of `Aluna, for all, in appreciation for your great work as we welcome all to guide us! So we stop fragmenting and look at local plans to prioritize that which is connected to the bigger picture of earth to heal, vs just connecting w/neighbors backyards, thinking they living local, or thinking we can try to define a local plan cut off from it's transboundary migration of large browsers ancient paths sharing their lessons, as well the fresh water from the mountains to all life in between, to let it flow to the marine life in the ocean that also require it! It will take some rethinking for many to understand our connectivity to the real world as we rebuild these microcosms into our local plans as we do one's best as earthlings to reconnect them on large scales as we prioritize this toxic mind and acts that depleted them, and restore giving all a nice sense of energy being reborn from the synergy of all sharing when can part time!!

So as to experience exploring our earth as well space once we focus and prioritize earth first! For many have no clue how many indigenous cultures have lived and few still living yet what they consider their home is now zoned in plots that allows others to develop as they drained water ways as in `Aluna's experience, that left their habits depleted, cut off from these requirements to make their lands ability to self sustain them, as they once did!

Which also has been done to many as many have no clue how we participate or our neighbors, and now will be able to hold them accountable as well ourselves, as our earth-space

message board now in the building stages will alert us earthlings, to when others are unable to locally hold one accountable w/early signs before habitats are destroyed! Realizing no ecosystem can be isolated! And how earth works as it is alive and life-death compounds circulate the earth, giving us all our daily tools to do one's organic exchanges to create natural communities, for they don't happen naturally! Same toxicity circulates through land-water-winds!

` [Aluna](#) movie on YouTube, which I thank them both!

It's time to go to work and enjoy being alive as we celebrate along the way, it's time to be in the moment truly having gratitude for the many good people guiding us, that can't do it alone! We all need to take part as we scale earth-space prioritizing ridding toxic and restoring ecological enhanced healthy working communities, as together we prioritize where to start w/what local plans!! As well to feel the earth below our feet, addressing oneself as well those in our path so as a community we reach out to those most vulnerable, for when we leave them alone, they will carry more disease!

I know my offerings locally, and the Gov is not listening! Meanwhile people sleeping on the street corners w/too much baggage trying to stay warm, yet have no bushwacking skills, as this can be very rainy weather, and not the place to carry water logged blankets! And this is on the corner of `Devroe, a place handing them out, supposedly helping people! Meanwhile many of these people are illegally camping in woods, so my beautiful road as I repeat, is very clean maybe a few hundred feet in, then ya got structures built and trash, due to people freaking out, mentally unstable getting pissed and crashing another's space! Owners pay more to clean it up, police kick them out, and the circle repeats itself, slowly improving as I respect our Sheriff as he gathers the med-social-psych-ER, etc. people and says, they are not working, too many mental people in my jail! As our plan could be permitting-analyzing-teaching w/skilled students help restoring empty trashed buildings making the community clean and safe w/love exchanged w/skills, as people's needs get met w/good exchanges to heal and do one's homework, helping where can!

As rooms are prioritized-people in need living in empty houses alone can gain assistance-backyards where tents can be placed to house-offer open kitchens from existing schools-sanitation as gyms-churches-open doors, and communities would be paying less in contributions, vs repeated patterns of long term residents left unable-students within all wanting to be yet unaware-ER continues to receive same patients, do I need to say more? Ok Juneau County, OR cannot even supply space to empty [`Leaven No Trace's](#) trash collected in the woods-rivers-ocean, etc. w/toxic pharm and more! Meanwhile some of the local neighbors had no clue it existed!

It is this local work that has created our structure for our earth-space message board and more as we travel the earth, exchanging-learning-sharing, as it continues!

I quote a lady I truly respect, Dr. Helen Caldicott who continues to try to educate us all on how toxic Nuclear is, as she states, `it is not over until it's over! So please all let's feel the energy of being alive and aware and share it, vs so many giving up or accepting dysfunctional as normal, meanwhile their mindbody is deteriorating along w/their immune systems, which Humans are required to keep in check, or we simply feed more pests! When in reality there are no pests! We create perfect conditions of toxic states, for them to move in-co_evolve and propagate as all life likes to do, putting more work on our organs, then they act as survival of the fittest mode stealing from each other, leaving us w/mixed signals that can be aided by skilled people!

We want to work w/all to get early signs very clear, so all stay within one's own control to heal and if can't w/early signs ask the many now skilled people we share in this Google Drive Document to help! So you see the need for our earth-space message board that is long overdue, so together all can link, no more being left behind, isolated w/dysfunction taking it as normal passed on behavior!

Helen has a nice archive, so please support her ongoing work for she give us policy changing material from her heart to save live and heal, along w/all of you, and each has a piece needed to make this happen; [Articles Archives](https://www.helencaldicott.com/for-a-green-future/#respond),
<https://www.helencaldicott.com/for-a-green-future/#respond>

But when I say all, I've been very selective in asking you all to come together w/us! I'm very focused and determined to continue, due to seeing much good work from many in fragments and some more able to continue in harmony! So when we do reach out we know how disrespectful people have been to like Prof Guy McPherson do see his work; [Nature Bats Last – Our days are numbered. Passionately pursue a life of excellence.](#)

Same SOCLA's history of indigneous, and many people, still getting it! But to see as in the links I share in this document, of so much work done from you all, I really hope we can structure a platform to bring pieces of work from all to the forefront to be a guiding story for us all to create upon and do one's part to help! So together we reach out and share to all of Humanity scaling the earth-space ridding toxic and restoring ecological enhanced healthy working communities, living w/mind and body in the moment doing all we can to stay in the moment, for this is truly all we have!

Please see Miguel's idea, as well his wife's work, Dr. Clara Nicholls, and we thank you both for fueling us to transition our virtual platform, to scale w/you all and join the Nyéléni Newsletter, whom we have great respect for;

[The Launch of SOCLA North America](#)
[Lecture by Miguel Altieri - Johns Hopkins Center for a Livable Future](#)
[Nyéléni Newsletter #35: Food Sovereignty at the rural-urban interface](#)

Take a breath of fresh air in between and if I, Kara can explain more or you have more to add about our connectivity to earth-space, your stories will be appreciated, as we try to share them even in this transition of building our new site!

It amazes me how for some time many have focused outside of earth, yet maybe we can work at getting one to focus on earth?? As we envision what once was, restoring huge biomes on each continent, knowing each time one does a local plan it then is connected to a living earth, Ex; letting the rivers flow or ancient trans boundary migration paths of large browser's, better means to see incoming weather, knowing from a space perspective where on earth has the most toxic to tune into the collective local plans negatively affecting most!

[How do we communicate with space?](#) Then and how now, to recycle tools where needed for earth? As well as other countries, for we've respected the efficiency of RU's space projects and more of their community's ability to multitask whereas NASA is very wasteful!

Can we apply taking pieces from good minds, we believe we can, let us know how far you want to go to understand what you do, what can we do? From here; <https://www.godspeedhollow.com/> to there; [kalmus](#)

**Who do you respect in space,
let's share viable tools now to use
and contacts?**

Please make space, grab paper and pencil and take some notes, let us know how we can fine tune or correct, to make this happen efficiently so all get real w/one's needs and offering to see how together each can have good reps speaking for your community effort!!

Take a breath of fresh air and please join in and share along your walbout for you and your communities, as you build your path as you walk it into your opening!

I subscribe to Google Scholar Alerts and you can too! This is 1 of the updates I received on 4.25.2020;

[\[PDF\] Methane escape from lowland terrestrial seepages-links to deglaciation and permafrost dynamics](#)

Hello,

Please see and share the above email.

Our idea of a collective plan is for all to define where on earth is affecting masses of species most, including Humans! The earth-space message board we are working on would have such a conversation w/skilled as in you folks, as we scale agroecological systems, where we think no one on earth can just live local and you folks have the skill to best guide us, and this above is a good Ex; of using good science, that you people know best!

Not this; [Bezos and Gates: What's their impact on the Climate Crisis? : Just Have a Think](#)

To think of Bill Gates promotions of these companies, leaving negative effects, is not using good science, Ex;

- large monocultures effects...

- toxic components to workers and soil...

- as `Functional medicine states nutritional diet changes are needed and these crops are toxic to many, especially if not organic, and now more additives to prevent waste?? Not to mention the processed foods are very toxic that add these ingredients as preservatives which many are addictive, in many foods! Not to mention how destructive of habitats as w/Cargill in the Amazon and more!

This list is lengthy! Please see work we respect showing more of Gate's Foundations dysfunctions; [AGRA Watch](#)

I feel we need to prioritize more on the microcosm's needs, that are more sensitive to keep these critters alive! So please inform us!

Who best to do that then those rooted in soil not to mention good science saving life that sustains Humans, as all I've chosen as I welcome their work as we simplify! Showing earth's habitat destruction-land mass being lost, permafrost releasing Methane, etc. as in the few links I show, and how best to define where to start w/what local plans? Not to fragment but to work into continents working together for our earth's circulation to rid toxic and continue to give us life giving tools to do one's organic exchanges balancing the genetic biodiversity to link w/neighbors! So all enhance one's living conditions as together we share the process of creating enhanced healthy working communities linking w/neighbors, ending false aid from afar!

Dave Borlace's work as Ex; so we bring in coverage of what is good science-discussing the controversy as w/Guy McPherson so these men can come to agreement of what needs to be researched if so, regarding Global Dimming aka Aerosol Masking Effect, as both have more videos on this subject if look at their offerings? That agro ecologists may be able to add some insight as well; [NEW STUDY : Greenland is melting seven times faster than 30 years ago.](#)

Whom best at SOCLA, over Ex; the controversy of Global Dimming aka Aerosol Masking effects, due to all the energy, as well disassociated energy from this controversy, so we can all redirect and channel into a shared focus of 1 Universal science of common sense for good tools

used daily by earthlings so all on same page w/efficiently doing, as our plans w/them suggest!
So people create and make them better!

I share this w/you all to give you this to rethink, so these local plans that skilled can define, can then be either further researched if needed, or defined how best to share in solidarity as well work w/locals, w/good investments created!

Then people get a grip of awareness so all hold self and others accountable, as all use 1 universal science, that presently is not being used, as I think all should grip the moment to make wrongs right!

Good Ex; US Gov and others w/911; [Lawyers' Committee 'Names Names' in New 9/11 Grand Jury Filing](#)

Another Ex; that brings me to tears is how corrupt CDC w/vaccines are! All need to be aware of this, this series if free if watch video each day, or buy them to support them to give it freely as they try to reach out to all of Humanity, showing the lack of research as well how toxic they have been, today is day 5, 4.27.2020:

https://go.thetruthaboutvaccines.com/sayer-ji/?a_bid=df9c99a1&a_aid=1619624&utm_campaign=Solo%253A%2520TTAV%2520Coronavirus%2520Guide%2520%2528W8X9b4%2529&utm_medium=email&utm_source=Daily%2520Newsletter&_ke=eyJrbF9lbWFpbCI6ICJrYXJlamVAaWN0dHMub3JnIiwgImtsX2NvbXBhbnlfaWQiOiAiSzJ2WEF5In0%253D

Thank you all for your feedback and if you can suggest to me, how best to help you all, as we transition and perfect this virtual platform, w/detail, so layman, scientists and Govs respect it and can work it for a variety of reasons! As well a peace platform w/skilled intermediaries! No more fragmenting rather we admit mistakes and go forward! We want to give it freely, so true needs get met and offerings shared as all get real living local, but until you skilled guide, many are left in the fog, or go ahead 5 steps and back 3! For so many supposedly skilled are misleading!

Ex; Do you have an earth-space map where you link skilled living w/agroecology, even if small patches to show real hands-on experiences, as students skilled focus directly w/like ecosystems to then orchestrate w/their local plan, eye to eye? So they then better understand, and then also contact one for advice to scale w/their neighbors small or large biome(s). So now locals restore yes w/collective local plans prioritized seeing that mode and maybe realizing they contributed personally or as a community or a local that misused-abused afar?? And now make a wrong right! Then when alerts come up, they rethink if they can help or want to invest in those priority collective local plans affecting perhaps them more than others or not?? Or they juggle their own local plan w/ideas, finding one's space?

Ok then as I suggested before, no matter what position one is in, as an Ex; refugee, homeless, long term resident wanting to explore, I feel as I see some communities are working at exchanges when Gov is or not interested, etc.. And if a local plan can cooperatively retain local

control of the ecology being enhanced, as w/agroecological systems w/neighbors, then locals gain jobs as well needs get met and offerings shared w/in those local plans, and now students skilled, using communities as classrooms, can fill in this blank investment layered schematic I thinking of, which needs to be created, so now always whether the local table or any message board linking to ours, can then show investments? Now the local plan sees needs and finds means to self-sustain, while also doing necessary exchange so earthlings are respected for one's experiences or even hands-on even ability to learn!

Or creatively show how as a shareholder in a local plan, always gaining position and needs to be met, they also can creatively do similar or more exchanges to local plans afar, and work into one's desire, as message boards organize these priorities so policies needed are worked at no more by just isolated communities, unable but to also see that earthlings can make an effect that is positive and already doing it, but still fragmented! Or those without still being overlooked as others misuse-abuse, and that we want to target so they too can become aware reflecting w/like ecosystems-seasons or subject, that we also want to make a nice archive of, and resources page to link yours and others!

This is real people talking to people, w/local investments creatively exchanged?? It does not have to be World market investors, but yes they too are changing their tune, as **Zen from `Moms Across America**, got an offering from another shareholder to take their place to go into shareholders meet of Monsanto, as I told some of you before! And explain more detail, actually, if you listen to the vaccine series today as there is 6 days left I believe, they are even putting glyphosate in vaccines and more toxic, untested, etc, or way too many in one series, etc.? But shareholders spoke up saying this has to change or we are not staying w/them when Zen spoke of Roundup's toxic glyphosate??

It is a law against Humanity to not be able to give-gain support for all to do one's homework, ending these scars forever, for the tools of the times are here to be perfected! So If you have already a earth map w/your links, then we would link it vs create one ourselves? But we also want to simplify and prioritize ridding toxic as well feel transboundary migration of large specie's communities `boon w/them have lessons to fuel agro ecological scaling of local plans, same letting them do their part, as well freshwater from mountains to all life on to the ocean's marine life! And w/natural building, a local plan is made! Whether permaculture as many are doing as you all know best!

Point is if we each can link what is needed, then this can happen sooner than later! A Gov offering me a Humanitarian fund is still doing their best to try to help us! They know my personal limitations as well I working w/tech volunteers, and I yet to come up w/funds needed for permits, to scale in their country and others!

So if anyone has such resources for a short term loan to get a good interest exchange, then please let me know! They have worked w/me for a few years and saw the many Human errors

we went through, that we can only have empathy for, for none were intentional, except a few scams! Yet still doing our best to offer help, within our limitations to each other!

Where if we can get a sense of common sense and have updates then locals can heal and see how cooperatively local plans scaling w/agroecology, at least w/my limited awareness, is the best to guide any local plan, and prioritizing to me is important for Humanity to then follow, working w/skilled students then to focus direct w/ya all! For as `Functional Medicine know well whole foods and supplements as they offer more for present virus understanding if did not see this link on our site; [The Functional Medicine Approach to COVID-19: Virus-Specific Nutraceutical and Botanical Agents](#)

Same Mike brings up some more points of this virus if yet to read, adding more to this puzzle, which to some **it is very clear due to the entire biome(s) that are alive, and many people are boon with these patches, as many are being broken apart, leaving species dying that are needed to fulfill the needs of balanced biodiversity, which gives us daily tools if we enhance gaining balance so as to link w/neighbors!**

We don't have time to think we can live local and clean up our own backyard, when yet if we open to our earth-space resources, together we can do so much more! But we can end these scars from not repeating and enjoy along the way, w/your help!

Do watch movie, [Aluna on Youtube](#) for they cover it all!

We know how **Geoff Lawton's** work as Greened many desert areas and more, as he has a nice archive too; <https://www.permaculturenews.org/author/geofflawton/>

Same get to know **Adam Haritan's** work; [Learn Your Land](#)

Mike Adams talks about how the vaccine for it would not work also;; [Young COVID-positive Redditors describe agony of ongoing symptoms nearly two months after getting sick](#)

Which I also shared on our site, **i come to talk story aka patches talk**; <https://www.iccts.org>, do to trying to aid those w/so much fear-based information over this pandemic of lack of awareness, as well researchers still working at it as well, so we need to have transparency, to know who is corrupt as the vaccine series states CDC is; https://go.thetruthaboutvaccines.com/sayer-ji/?a_bid=df9c99a1&a_aid=1619624&utm_campaign=Solo%253A%2520TTAV%2520Coronavirus%2520Guide%2520

We all can do so much more once organized and message boards linking, as we've done in the past over other subjects, even if locals without internet drew pictures and posted or sharing stories in the dirt or on the beach, whatever it takes to get an understanding??

I see a lot of controversy w/climate change, many feel carbon is good for life, and others see the negative of too much, then others want to cut it cold turkey thinking fuel plants leave most, while others feel it is a combination from us all, and some feel it can't be cut cold turkey for the Aerosol Masking aka Global Dimming effects are what is cooling the planet, giving us time to go figure? And If stopped ASAP, the complex life could not possibly handle such temperature changes, or can they if we do this right? For they fuel the life that Humans sustain from, pollinating our foods, building our soils, balancing pests, and much more, etc..

So it is time to put them first and who knows best, then these people to guide us!

So if we can create this infrastructure to support you, it is our goal! What we are doing now is with volunteers! I still have one trying to give us a Humanitarian fund, we together have created a lot of this, for it is time for Govs to realize it is not just an inner-inter personal issue amongst us humans, rather understand what sustains us humans on earth which is out of many of our scope, but to understand where these compounds come from, both daily organic tools as well toxins? As continents have duties to understand why the genetic biodiversity balance requires a working communication w/neighbors to link it, not wars! Then to also realize the continental offerings of life-death cycles, compounds circulating the earth via land-air-ocean to give all our daily organic tools, as in the sands of the deserts fueling the Amazon Forest, etc!

If anyone out there can give us a short term loan w/good exchange, please share this email w/them, for me, kara; farmwuwei@gmail.com Thank you!

As well all of you please realize, the kareje@ictts.org email is in error and I am working w/Google now to end it yet keep the same email name for our US nonprofit, which I will confirm once in good working order. To continue our AdGrant w/them. But in this transition, it is best to email me at this farm email to make sure I get it!

I have worked w/**Google's AdGrant since 2014 and appreciate their global tech help!** If you have special targets-time sensitive alerts, to help get this transition shared, then I'm happy if you give some heads up to turn these ads toward your objective w/my URL, as that is what they require! But as long as it is not for profit, I can create a story from you on my landing page w/your link for people to reach your objective? Give me a few lines creating the ads and photos as well locations, and I share globally to all but a handful that legally Google can not advertise too! I hope you all will share with us! And I can give you those countries' names at times you want me to place the Ads?

Right now, we are moving forward one way or the other, and your guidance is appreciated if you can help fill in more detail or correct us? Ex; if you don't have an earth map to link your skilled people that either is willing to share their living experience now w/agroecology or have an interest in sharing what they would need to guide our platform to better represent you all, as in contacts, of individuals perhaps that we could link via address closest to one's community throughout the earth?

Or even work w/groups where Gov does or does not and start w/perhaps a fragment of a bigger plan later or even small plans so that people can envision the reality of neighbors joining in or old policies of boundaries being rid as in Oregon now, w/some 1800's policy still restricting! So as to not have to redo what can be done now to use good technology from good stewards still living it! Same those willing to travel, when no one is local to guide?

Would you all consider aiding a blank overview to give skilled students ideas to fill in for one's communities local plans as well the collective of earth-space as we prioritize toxic-research if need-resolve w/investments, so all local plans prioritize these, actually adding layers for one's own connections to enhance or which hurts??

So Ex; when thinking of like ideas that all earthlings require, as in microcosms required-composting-watershed-riding the toxic-transitioning Industrial Agriculture-cleaning up war zones, even like UN's recent mapping of Syria showing actual paths of entry and exit vs where active Military-peace platforms transparent w/these skilled intermediaries of what I cover and more?? So medicinal gardens for each to be customized for known diseases of the area so each customizes and individualizes within this basic earth-space layered schematic, all humans. So now the same blank forms can co_evolve w/exchanges updated and old archived so as to see the transition of where starting from!

I see no better education than for students within all gain volunteering skills and credits, as well to make pen pals as future tour guides can't get better than that to explore a desire throughout earth-space on same page w/1 universal science of common sense being shared-corrected and more links of solutions, plus for Univ and schools to co_evolve their curriculum working w/students and communities, as ecological enhanced sustaining healthy working community local plans are prioritizing the collective plan as well their own local plans!! Networking this, we may see skilled investors then going from like local plans to others in certain layers they are skilled in, same people w/experiences for jobs??

The Sky's the limit, as well no better tourism to welcome people as we start introducing w/local grown wild potluck-live music-focus directed conversation w/follow up meets, so all have space to be heard, and as like subject joins in groups then posts updates! Same people start realizing what is in their food as well. Why ill and what can be done?? For we are not accepting our bad behaviors picked up as normal, many of us are adults and capable of learning to use our whole being more efficiently!

We do admit the many years of being isolated and have no interest to do this for our children, rather we want them to know we want them to be clear of our mistakes and walk by our sides to help us share Humanity's solutions, knowing we can define these priorities and what needs further research and what can be resolve w/good investments, as skilled are ready to share what works!

I share a few thoughts to rethink with and thank all for their offerings;

<https://www.youtube.com/watch?v=8j4Lhl8C9rs&feature=youtu.be>

[2°C crossed](#)

[Edge of Extinction: Please Stop Wishing for Extinction](#)

[Edge of Extinction: Amazon Tipping Point?](#)

[Global Dimming Paradox: Are we facing an abrupt temperature spike?](#)

[Antarctica : What happens if the 'Doomsday' Glacier collapses?](#)

Sayer Ji's new book's [Sample Chapter](#)

[An Introduction to Ecological Economics](#) to reflect as we create a blank as skilled students network then bring home eye to eye the discussion as local then will go figure what can work for their local plan and what doesn't!

We thank all above and below!

I'll end this sharing good work that we know can be done and is, in many local communities on this earth! **I thank Lynn and ladies locally, Jenny, Wendy and the mamas-papas of the earth that let their children simply be one w/nature knowing we must create this balance! Pathak and communities sharing w/UN such clarity that they speak for all of Humanity! Joseph and communities they work with aiding Ebola orphans and amputees, and more for all they do, that have suffered as well continued building community where others have stopped, to prevent children from going to bed hungry and more!**

We have work to do together to end what Lynn and locals on earth share below, and we share above, which I thank her for her continued efforts working w/many, that we know our plans can end and more w/your help! Knowing it works as locals on earth continue to make it happen!

We see no better simple way to do this then to gather all to talk to each other as we all listen in transparency filling in what is missing content w/good tech skills as Brittany is doing her best to help as we speak to transition! Thank you! Brittany for the great job!

Ps to name a few, and skilled students in every community, as you welcome the students within all! Using communities as extended or only classrooms, are best to focus direct orchestrating w/communities, defining their list once networking these plans, creating w/us! Then for each to fill out the blank investments, reps posting on our message board, so all earthlings can get on the same page, changing policies, co_evolving curriculums while restoring ecological enhanced healthy working communities as we do agroecological assessments, w/plans creating a beautiful piece of living art as all get one's needs met and offering shared working w/in the local plans!!

When it comes to errors here, please ask me, kara, for as you know me I not a good editor when working so hard so sorry I do my best to simplify!

Thank you all! Sincerely, kara speaking for our combined `effects...

Note from Lynn!

Hi All,

Do We the People still have a FOI Act = Freedom of Information Act? Constitutional Rights or Bill of Rights ? What about our Declaration of Independence?

My DAD and brothers were Naval Air, Marines, Army, Navy and our current Govt systems is NOT what they fought for!

We (OUR USA) have 883 plus military bases worldwide in 177 countries or more?

Time to Follow our Govt subsidies going to a Partial Cost of WAR and Depopulation Agenda information.

How much money is going into mass bombing and Depleted Uranium Equipment with innocent civilians involved?

How many bases have robotic warfare projects, DUMBs, DEWs? How many bases have transhuman super soldiers & or MK ultra training projects? How many weatherization weapon systems are there worldwide being used against the 99% of the population? Who allocated another 1.3 trillion dollars of funding for 16 more nuclear weapon sites? Check out geoengineeringwatch.org and nuclearplanet.com

How many old nuclear plants and nuclear waste areas do we still have in the USA and worldwide?

How do we use earth Google maps to find the 400 biological chemical warfare sites tied to vaccination farms tied to BIG PHARMA via CDC funds and WHO?

How can we find info on the BIG PHARMA and Monsanto (Agent Orange producer in Viet Nam) now involved in GMO Farming and major pesticides merge?

How can we the people get OUR Govt subsidies back to a People's Budget and stop the bailouts for Wall Street, QE Banking system profitters & Federal Reserve banking systems that help serve up the Bayer and Monsanto merger and our continued BIG Govt military spending to divide and conquer US by a plutocracy party tied to the Elite corporatocracy systems that is corrupted?

How do we follow the money and equipment being spent on All OUR massive military equipment that uses Ai = Artificial Intelligence that can be hacked?

Time for All militarizes to stand down and GO GREEN together for Mother Earth, which is our HOME to all! We also need new WPA for evolving loving Heart and Soul community services with a good basic guaranteed income with single-payer/improved medicare for all/universal health care with tiny homes or apartments for all to DE-STRESS and unite beyond old limited, fearful, reactive ego mind systems that have used race, religions, gender and political systems to divide to conquer the masses with more AI, drugs, drug wars and militarism projects & training.

Time to open conscious evolution/healing arts alternative healing centers in every community open 24/7 to help heal 99% of the PTSD, mental health problems and abuse because all the answers are within each person who is angry or upset! Google all answers are within... Google natural healing for bacteria and viruses too!

We also need legislation for massive green civil services for edible landscaping crews, and hydroponic facilities to grow all the natural herbs, botanical essential oils, edible flowers, fruits, nuts, berries, veggies and beekeepers that can heal 99.99% of all bacteria and viruses too!

We are all connected to all the problems and what we focus our intentions and Govt policies and monies on... WE WILL GET MORE OF!

Legislation for heart and soul community services will focus intentions, monies, new banking systems needed for mass media to help co-create world healing and peace jobs and projects for all.

It is unlimited universes we have been cut off from for eons on this planet.

LOVE is the Answer,
Lynn Mystic-Healer

◇◇◇◇◇◇<<◇

Please see my letter, kara to Dr. Steven Greer;

Hello Dr. Greer,

Please note I always found your work which I yet to truly study, interesting!

But I also have been very preoccupied in getting out of one thing and into another!
Right now we are working on transitioning our virtual platform w/our US nonprofit, as I have a plateful of human errors as well I have been working w/Google's AdGrant since 2014, and now need to correct and comply with their mistakes now..

We are creating a structure to freely give to all sharing Humanity's solutions scaling earth w/agroecological systems as well an earth-space message board, prioritizing that which collectively effects most now negatively and do what can to resolve or research as well create good investments to do good technology!

That brings me back to intelligent beings as you state, that have this technology so why waste Humans minds and energy for I do not support large alternative grids! And if energy exists as my man had researched Teslas long ago, and more, so we on earth should end these scars forever, and as you once said I heard, you stated this intelligence would not come to earth to help us until we do it!

Ok meanwhile I see your offerings above, and I realize how I lived many years unaware of how we interfere in others or other species as we stay preoccupied in what we think is important!

I am now trying to transition our virtual platform to do all we can to share Humanity's solutions on earth and from universes! For I do feel a few times something, as well I

channel energy w/others both dead thru photos and alive across earth! I am not stable to understand all this, but I am putting myself out as I work w/few Govs to make a peace platform w/intermediaries to set truth right for each to self reflect and understand what is missing!

Ex; I see you in above offerings, also offer other affiliate profits to be made! I too have been studying strategic marketing yet to know it, but also Jeff at Amazon told me he was transitioning, so I talked to them about a grant to aid our project, but then when I asked if he would stop 5g I got no answer, so when they offered me a job to make great money I said no, even though I need it to cover some Human errors and few scams last year as well now just my man is recovering from a near death in accident and just also lost another family member, due to her unawareness of being ill and managing early signs in past, then to go to unskilled western Dr all along, and tests show nothing!

Meanwhile I tried to channel energy to define if she was able to change or if dying, when my brother and her family freaked out and brought her home and stopped feeding her, when I became aware of this? Then they watched what they felt was a healthy active person, after my brother unskilled in our family of dysfunction, all suffering the same w/unskilled to guide as in some in western medicine, then for me to see Functional Medicine healing!

Point is, no one should have to watch a body decompose in 3 months like my family did freaking! Doing all they could to help her!

So as much as you say what you do yet I don't understand how you can too make profits w/Ex; Amazon and others, meanwhile they are putting satellites of 5g in lower orbit very toxic, as Functional Medicine knows now how 2-3-4g has made many ill and when they remove wifi they heal, same w/many students in schools! So skilled say we need to go back to wires or more suffering and disease!

Sir, I don't expect you to know all, but Josh del Sol can share more for he and others have done great work to help us all become aware of this w/5g and more! Same he work w/Sayer ji, that also trying to help people become aware of that as well one's own health, and I working w/SOCLA Latin American scientists w/agroecology, as I've respected Emeritus Professor Miguel Altieri for many years as he w/indigenous good stewards still living w/agroecological systems, created curriculum w/this, and does

great work on earth. As well they all too know well of the land-sea-freshwater grabbing and have a history of others abusing-misusing!

But they as I too know we must change nutritional habits as well many do not have to struggle w/sanctions over crops as in wheat-barley-rye, especially if farmers already suffer w/GMO's and more control and \$ losing? When Functional Medicine shows they are toxic for one's health depending on one's underlying conditions so this pyramid has changed upside down!

Plus if saw **Sadhguru the Hatha Yoga teacher, how many w/ Cauvery Calling has driven through India working to restore saving rivers**, building soil, planting trees, doing agroforestry making changes now w/Gov as all aboard! And now farmers from once committing suicides due to control s of Monsanto and more, they now profiting 300-800% and ecology is changing w/mindsets of understanding, how we've destroyed our habitats!

So same w/vaccines, much controversy, but I cannot support them, nor those that profit over interfering in another being's life or any species!

In saying that we welcome your conversation w/others we respect so people bypass this controversy and get on the same page saving life, not interfering in one's own as well others! And heal-restore-prioritize what where to do first as in our collective plan we are working at now w/tech to structure so we can reach out to earthlings as well if intelligence in universes that can or want to also help us or we them in exchange??

I think I told you this in last email, but the day you released your 5th video and emailed me I awoke that morning w/first words being yes they are intelligent beings, not funny looking aliens like star trek, rather earthlings that bypassed all the untruths of human programming and had or took good minds and created technology and did travel to other universes, or did learn how to live forever in whatever body??

Understanding this global consciousness or universal consciousness as all one, if one can get there as I see I 've stumbled here and there, w/all my life understanding processing each moment, prioritizing energy I would chase early on, and once tried to study and got more confused and came back to just doing, so I was feeling deep within always, but at beginning had limited access or awareness of human tools within?

Where I now see Sadhguru's course in inner engineering and yoga, as he states we came w/no manual! He has excellent Yogi teachers teaching inner engineering!

Also w/a bit of your readings, I visioned a face that was not human but kind, and then went away, another time in my life before you I also looked at a star and the energy connected to me and I got scared, but as I state I doing as I see fit to do with what I know. And now I feel I would like and already have co_evolved our ideas on climate change and restoration of energy for earth and have an idea of a monitoring system as a spider web surrounding earth multifunctional, for no one should allow earthlings to suffer as we have!

So whether I do connect w/answers etherically or eye to eye, I would like to be respected by all where everyone is or a group to also help us, so no more scars continue and we as humans don't go 5 steps forward and back 3 due to what a friend feels, as our human design of being an organism, is in reality a combination of parasitic pathology within! As arrogance, as we continue to strive for good, yet the greed of parasitizing within gives us mixed signals, and we yet to go figure rewiring our what??

Where it could be as simple as `Tapping to rewire our brain, working through childhood trauma, etc.. Functional Medicine does w/testing of deficient micronutrients as well whole foods using no pharma unless ER and short term, knowing western medicine's curriculum needs to be updated and all go back to school! As well I've had the opportunity to meet both western skilled in psychiatry that went on to Eastern medicine to then realize how to heal! As well few others in TCM that I respect, as well 1 willing to also have this conversation as we get on the same page skillfully, and that is beyond my scope, some of the pathology-psychobiology-simple metabolic know-how, etc!

Windbridge, long ago, did welcome me to join, as they do science and teach talking to the deceased, and try to go figure?? As well Anna Brekenstone the animal communicator, just made a nice talk, I only saw intro, but she appears to believe to let nature take its course and I just shared w/her about my feelings of wanting to communicate if higher intelligence can help us on earth first, and then yes I would love to explore more!

But I'm a mama earth bush girl loving every creature and bypass materialism to save life as well have no interest in gaining from ecological whors, no matter how poor I've been or in need as I have been at times!

I understand some of you too, cannot be bought! I told Pres Trump when he asked me to manage his campaign this last year, our project needs to be done! I was not as clear on all as I am today, when I shared and he said no one wanted what I wanted, they wanted immigration, and I said he missed my point, for we welcome earthlings, and now I say all of existence anywhere!

Humanity now on earth has many solutions, and I am not skilled in the controversy I see w/climate change, but I was ill over it, when first experienced, when Guy McPherson told me, if Arctic Ice melts we may have only 10 years or so, of human existence left on earth! As well those jet streams influence weather making it hard on many unaware as a community, yet to use good technology!

As now we will scale agroecology-create w/large transboundary migrations, so they fuel local plans path and w/natural building w/good stewards creating good technology so we, meaning Humanity via our earth-space message board do define in our collective plan what local plan to start.

So all then can respect those locals and work w/them doing what is needed for earthlings, both in sharing in solidarity as well students skilled networking using our base empty layered investment template to then fill in good investments to `enhance these plans working within their nature's ability!

Always prioritizing earth-space life-death cycles circulating earth-space giving us daily tools for each to do one's organic exchanges required to balance one's genetic biodiversity so one's community links it's natural resources of all beings-critters w/neighbors to sustain, ending false aid from afar!

For there is no natural balance, we as earthlings must create it! Composting, growing fuel as whole foods, maintaining discipline over one's self sensory observations vs chase belief of misuse-abuse!

If you look at our site I've tried to ease the COVID 19 present fear based alarm by sharing links I respect, along w/just recently associating it w/a peace platform, addressing sanctions, so I added this G Drive document to that site!

If interested in reviewing and taking part there, as well share and I appreciate your feedback to all of what I state and let me help so if you have access to communicate w/these intelligent beings, share w/them I'm willing to listen and apply to earthlings more efficiency as we construct this earth-space platform; even navigate links thru universes, as we navigate on earth sailing oceans! I see this can be done, if they do exist? Or we continue to prioritize what we think we can do now!

Our site until new ones being made published; <https://www.ictts.org> and here is link directly to G Drive Document on there, that I shared recently w/many; (which is this one to share) [#EndSanctions #SaveLives as all rethink sharing more detail on our peace platform in the building!](#)

Thank you for your work! Thank you for rethinking your association w/those leaving negative effects on earth-space as well I appreciate your attempt to communicate w/those leaving negative effects on life on earth, 5G for starters! For I don't know you that well and would have to look into all your affiliates??

Peace is real and yes we each can do our part to make it happen, and that is what I hope our platform can do w/your support as well!

Also please note **if have funding available from one's you know interested in seeing our project happen faster, I'm trying now to fundraise for \$10k to do what it takes to go forward to scale earth, and As I stated I could pay back this loan soon as I have a Humanitarian fund awaiting me to do this, and with that I'm open to listen to your needs! But I'm serious about having to have all aboard, we can't have like Amazon-SpaceX-OneWeb put up 20 k satellites of 5G polluting earth then also give them means to do more damage on the life that sustains us all!**

But if you can gather in conversation on this privately if you all prefer, or w/transparency of all agree, say on YouTube then we will open the channels and prepare, targeting our \$10k/month in Ads from our Google AdGrant, to reach out

globally as well space w/conscious beings! But Sir, I don't understand why you are not doing what I am trying now, vs just observing all these years you have been involved?

I look at them like Gov, if we try our best to communicate and they don't, then we the people have solutions now, sure maybe still work through this carbon controversy of carbon good or bad and get real w/healthy balance for all life, sharing that understanding of that now using it???

But we certainly know enough to restore local plans w/agroecology so bad weather don't flood and kill but water stays in ground, as one from SOCLA visited survivors in Mozambique after cyclone killing many, and told them about a like ecosystem w/agroecology that keeps water in ground! Or create yearly water from those going to be hungry from seasonal water, same ending one's co_dependencies' creating these 1% er's, etc.

Working w/neighbors making peace understanding how we destroy the life that sustains us! Sure we may yet to get to total rewiring needed to overcome this pathological parasitic issue within us, as a parasite date rates and anesthetize as in our oral biome, then disease from it travels within human's body, as Dentists in Functional Medicine know well! But yet to know how to stop it??

As it produces our arrogance if my friend that had to do his own dental surgery to remove this parasitic plaque has done for 10 years to stop his cluster headaches-gain better vision and hearing, and seeks a surgeon to open his face to do like a laser to remove all so he does not have to continue to painful process, as he has figured out a lot, and feels if a child before 10 or so continued to brush one's teeth with lactose or mama's milk then they would not get this parasite that loves to live within doing what it does to survive!

How to end such disbelief of religion or science or whatever belief that gives people comfort, is the arrogance my friend speaks of, that continues these scars to continue to repeat themselves!

And together all go figure a way to truly understand what a living organism Humans are, co_evolution on earth or came to earth?? And do our best w/what we do understand, ending suffering and all entities associated as in Industrial Military

Complex and Agricultures as largest footprints and other toxic developments ASAP, as local plans will know best once students skilled fueling focus directing using communities as classrooms, prioritizing collective plan and then falling into place where can to find oneself and one's space to mindfully act locally w/earth below one's feet and afar!

So much to learn yet about science within to tell what is truly happening as well without, locally and afar! That too can be put into retrospect so 1 universal science of common sense makes wrongs right, w/efficiency or we use a verbiage or energy that does??

Thank you again and I look forward to your suggestions!

Sincerely, kara j lincoln

<><><><><><><>><><><>

#EndSanctionsSaveLives

As we all think across the board and tell us why each side does what it does, please??

Let's take a break from responding to fear based misinformation on the COVID 19 as I ask your help on what your take is of our plans being worked? And how we can better this virtual platform for you to take part!

Please when can share and give me feedback to guide me where can?? I want to thank all of you for your work, which has led me to doing mine!

Hello,

I'm new w/you people at USPC as well learning about sanctions?? I realize if I would've accepted Pres Trump's request for me to manage his Pres Campaign now perhaps I could be more helpful to Humanity, but I'm a mama earth bush babushki and I really worked hard to want him to like our plans, although when I spoke to him last year not all where as clear as now, but I knew in my heart I had to say no and continue to develop them for the sake of saving life on this earth, so as to prevent more from suffering! As I know well too many times, from so much dysfunction that exists now, continuing from the past that I feel together, all can end!

Good Ex; How Karen just died for those I have yet to update! Not to mention many more suffering as misuse-abuse continues!

What I find would be helpful to me and many, would be to give more detail of products-services-people's contacts of who is doing what when and where that negatively interfere in who, and same timeline, as we try to stay in real time w/all??

I'm working on a peace platform w/Govs, w/intermediary thought of skilled giving all, on both sides reality checks!

I was going to share if interested, and my computer broke so I lost work and will be doing it again, we are a US nonprofit focusing on some nice plans sharing Humanity's solutions! Everyone we have on our site link below I have the utmost respect for their work as well their ability to co_evolve when see one is wrong, to make it right! Plus I have Govs behind the scenes also doing all they can to also co_evolve ending wars w/these offerings we are presently working at, so as in our message board being created, all can join in!

We all have Human errors and if we can gain respect for oneself as well those on the other side and realize these errors will be with us for a bit, for it takes rewiring as we are a resultant of our experiences, and those that past on love thought they did all they could be//the scars they juggled!

So please lets share solutions and have empathy and respect that those interfering yet to be aware can also be reached, so together we prioritize these early signs, so we can have a conversation w/each other when still the displaced energy is within everyone's control to gain one's center and ground if we speak truth and share what works! Then theis team of intermediaries I feel all these links I share on our site, are well skilled in knowing where best from who to guide us all!

Especially on peace platforms we need to open w/transparency, to open to Humanity's solutions now!

SO Ex; when you say and others about medicines not getting in, what type of medicines, for US western Drs. need to co_evolve the curriculum to Ex; Functional Medicine; www.ifm.org if so you all would look at the COVID 19 issues differently. I see many people w/fear based misinformation, and I've shared some links others can make up their own mind with as well follow thru, w/people I respect!

W/as simple as making your own mask! Here in ER admittance, one does not even have to test, for many don't want to know, plus testing is not right anyhow as you will read on our site links I shared, of the virus itself; www.icfts.org, so it is fragmented?

We are working technically to create these underlying plans, as we transition from our present sites. Working on a technical structure addressing more efficiency, from our research to define this and not have to fund raise, for Humanity to have access freely to this information that is long in the coming, when yet people like UN and Gov's still can come aboard and provide w/your resources more or join in w/us!

We are limited and seeking funds to pay the fees required from country's to scale this project as well cover my past losses due to the Human errors this last year from people in skilled positions, not responsible for taking charge for their staff errors! Then to have it snowball on us along w/a few scams on us personally! And this happens to many, yet to gain support is out of real time! Once our message board is up and running, it will change this history, so more should anyone carry this fear deep within that totally can steal energy from our moment, as many people are left in the fog unable to realize disease does not just appear! sadly western medicines' dysfunction also does not have the proper testing to even show these energy imbalances until diseased states appear, leaving many suffer when never should this have continued!

Not to mention the many people that many of you know well are interfered with via land-seas-fresh water grabbing, yet those locals unable to do something to sustain, while locals of those misusing-abusing locally as well afar, also are not held accountable!

So change is coming for many and many already in patches throughout earth are willing to share what works and we aim to connect them w/pockets without! As together skilled guide us to prioritize these local plans to start, so this team that forms comes together to assess how best to resolve from the soil up w/agroecology as Miguel Altieri and his associates w/SOCLA have people around the planet using this good technology as good stewards, knowing well w/severe weather water can stay in the ground as Ex; vs as in Mozambique showed where many died in the flood, and a SOCLA assoc went there to talk to the survivors showing them another likek ecosystem community where this is real!

We want all to help us go beyond just plotting these experiences, on our earth-space message board as we prioritize which most toxic affecting most life?? We want to define if research is needed by who, how much?, working w/those locals to do this local plan? Or if not how much funds needed or support in what by who, where whether on earth or in space? As Investments are continually layed out in layers, knowing well the locals control the local plan, so ecologically no more does investors or Govs take over and negatively leave toxic effects!

Rather it is their job to reassure good reps of these collective plans are prioritized as well then local plans everywhere follow up doing the same! Defining where and how, holding self and others accountable locally and afar, I repeat for this is not happening why?? So all local plans retain support as well people check in w/oneself to define the effects we all leave and correct it via self or it is these groups formed to define via collective critical thinkers to see how best to resolve for those left behind, as many now already have created great local projects, yet many still fragmenting! It is this collective effort to take pieces where needed and show real hands on experiences, for all then to rethink what they too can do w/collective priority local plans, as well any local plan and the soil below one's feet to stay grounded!

Local plans many have prioritized, yet failed to look at the collective local plans leaving negative effects on some more than others! We have an idea to share later to do a multifunctional monitoring system off earth-space, via nano tech to efficiently give early signs as well solutions from the many skilled now, yet to have support in financing etc.. Yet Govs and UN fail to focus as earthlings, too busy stuck w/dysfunction on one's own back yard due to lack of transparency, w/Humanity's solutions now!

Good investments can be made to make this happen right now! And it can start w/me, please! As I seek the first loan to do this, permits can be paid, as well fund Miguel's team and Guys, so as to know how best to cover earth-space doing priorities as they help us structure this virtual tool to make this happen??

So people become aware of how all are needed to make this happen, so all message boards start connecting where can, and w/us as it is created to accommodate these plans! We are working w/skilled technical people to do this as well as I have started to speak! Then working w/skilled students, as each person gathers w/one's community and reaches out welcoming one's-Univ's skilled students-professors to then network to all local schools our plans-social media platforms-Govs-people, prioritizing all life, that Miguel and his team know well! To collectively guide as others help sort out solutions that are abundant, as we take despair and the much misinformation, as well corruption and manipulation, that is happening and sort it out! For each one has many opportunities to make them right in an ecological plan enhancing what truly sustains the life that sustains Humanity!

Where blame is replaced w/going in and cleaning up our own baggage! Where hatred is replaced w/healing realizing what suffering causes! Where love is realized it to is not enough as many remain fragmented w/what they think they know, when yet skilled life can be at one's

doorstep via teleconferencing as communities network and as well one's students giving hands on to orchestrate this, sharing within all, gain volunteering skills as well toward credits before they graduate, as co_evolving curriculums are also prioritized, while restoring ecological sustaining healthy working communities w/neighbors!

Ending this false aid from afar! Sadhguru's Culvery Calling has proved what agroforestry can do so much more, and w/agroecology much more! As in India, along w/much more taking farmers in poverty to gain 300-800% profits while saving the rivers along the way! As Gov and people everywhere now in India are listening and doing what can to make changes to stop these outdated policies that have interfered producing this, and now listening to each other to correct it! As we welcome them to listen to us and take part sharing the good as well realizing how to create upon our plans! As well add back for others to truly understand what is in our genes from ancient beginnings as Sayer Ji has done such a good job reporting in this new biology, that many in western medicine has yet to get it!

In this collective plan we want those aware like Emeritus Professor Guy McPherson, to guide his team, who is doing his best to stay on top of what is w/climate change in the present-past and future ideas, yet much is ignored or fragmented from Govs and people left in controversy! So we want Guy to interpret w/all in a conversation as we deal w/serious time sensitive misuse-abuse in nature as well within ourselves, w/all teams on same page as our tech has great ideas to reach out once we get over a few more technical errors and do what we feel w/your support can efficiently do this or let us know from each what you require to make space to prioritize these thoughts to act?

I know in our travels via sailboat, we gathered in natural wild potlucks mostly at farms or on a location, say Ex; Solomon Islands at time of Malaria meet, so where ever we have been we prioritize real happenings and then focus direct into why and what missing, sharing the work of Miguel, and Guy has come into my life after these travels and we continued in Port Townsend, WA w/this subject as it continued to be built!

But we shared ideas of prioritizing soil building-composting-building genetic biodiversity to link w/neighbors-natural building-alternative energy decentralizing w/localized systems of low impact, working w/neighbors, preventing large grids from ecologically interfering or profiteers wanting control over locals, etc.. and yes still confront issues such as demands to be plugged into the local grid, when thought we could be off it self sustaining as a community but no way? Or community thinking doing aware projects yet some highschool children had to quit volunteering at the local food bank, due to being embarrassed of seeing one's neighbors! Or even nice cooperatives having young homeschooled becoming great beings as they interrelate w/children vs control them as adults throwing their baggage on them, meanwhile still others stealing from the family!

Traveling the oceans hearing the Rwandan war made me sick, as a child I already perceived what children feel from afar, yet many parents participate in wars, not realizing their own

children also most likely are having day and night visions w/mixed signals, unaware of the affects we leave on them and others!

Meanwhile humans have such good inner tools yet many undeveloped! Point is war has to stop as well, toxicity can be replaced but much of life continues to suffer to death as well die prematurely and that is what we feel can stop! Tools are here and we can do this together!

Solutions realizing what choices we make can keep us humans able to work through anything if healthy enough to perceive and skilled enough to ask for help to see our options to process it!

Chris Luck is an entrepreneur, professor of mine that is co_evolutioning this strategic marketing, as he has created a private platform for people to share becoming an entrepreneur, so more people can realize solutions are here to transition inner personally or if stuck on your own brand support his and financially gain, while getting real w/oneself! So please check him out?

Ok you may say kara, what?? And I say yes, some of you knowing me would not deal w/some of these people Chris shares lessons from, as they are the biggest ecological whores on the planet! But why I like Chris is he is teaching me logistics as he speaks for himself and not them, rather I realized empathy for these whores now, where long ago i contacted Oprah, Gates Foundation, Soros, Musk and Bozos and more not here to ask them if they would transition and join in, and they they either did not answer me or they answered and wanted to give me big money to do it their way and I said no! But I do realize now how we feed them and they did not become what they are alone, as well we can stop feeding off them and they too will either change or lose, it will be their choice! But Ex; when my mom long ago loved watching Oprah, and I said mom take a look at her portfolio, her marketing is the biggest whor job I ever saw and that was long ago, since then when I heard she was ill I tried to share again but no answer. But mom passed on a sheet to me of her beautiful little patch I loved, plus mom would go w/my aunt to the dump and or used stores and buy cloth to re sew my dress, even a gunny sack at times, and she did beautiful work! But for here to learn that Oprah would sell or gift \$5000. sheets, well I need not say no more, mom still loved her! This is called programming! For mom forgave everyone all her life!

So the point here is I stay w/Chris as he wants me to learn how to fish, w/value! He does not want to donate or give me a loan or do ya Chris?? For I'm willing to start off this project I speak of, as I know how beautiful a few in Gov feel to me, as I've followed not just my heart but I've done my best to communicate this last year plus, and they did not intend to make war, or interfere in other's lives as they did! Rather it is a programmed rewiring that needs to take place and it can start here! I can work slowly w/my techs, volunteers and progress or they too can have help and we progress faster as we all reach out and take part or contact me, kara, and I will answer more of your questions if I can, even add a group if you like and we can do a Google Hangout or tell me what works for you?? Respecting others' privacy? Let me know what ya want to know, as well if you want to invest by giving me a short term loan w/a good interest that you name, as well or choose to donate to us as a US nonprofit!

To start this ball rolling into local collective plan's investments, then to follow all local plans investments, that we can reach out to w/Google's AdGrants for our US 501.c3 nonprofit association; i come to talk story (ictts.org) as they reach almost the entire world, and in respect to their continued support we will do this project thru them and Nabble, who also can do much freely for those of you yet to organize and soon we will be showing you others as well on our resource page! Plus we want to have help to reach all others that Google does not reach out to!

We have a large Humanitarian fund awaiting, and the Human errors this last year has detained it. So now, if I can get the \$10k for permits, legalities, etc., as we've covered many errors so far, to scale as required, so if I have one interested in loaning, I will pay back in a few weeks! Then we will rethink, for I will not need to make more and yet we can still give our virtual platform freely, as we will then have funds to pay to finish technical plans needed! Please realize it is best to contact me, kara at this email due to an error on Google email I am in the middle now to correct. Plus to do business I cannot do it through my nonprofit affiliation w/Google's Adgrant, and the fund has been offered to me as I choose, which I've chosen myself vs giving it to the nonprofit. So that I can make funds to support more to give this ictts platform freely to as far as we all can reach as we do this efficiently working together!

But Google allows us to support this plan, making funds profiting to support ictts.org and from now until errors corrected I will use this email; farmwuwei@gmail.com

For more detail, check out our site now that is being restructured as we speak; www.ictts.org, for a virtual platform to continue freely as we reach out to all w/one's help! As well while doing this transition we now for the first time are seeking Donations for ictts.org and if you choose to go that route please do on that site thru Kindest. For once new sites get structured we no more will collect Donations except for special projects siding others to do these plans as we retain priorities and will share more on that later.

We are scaling earth-space to prioritize ridding toxic as well scale agroecological systems and few plans to do a collective plan w/all via message board to further define what is negatively affecting most life so as to focus direct w/skilled students to exponentially network, so as to define these solutions first doing those local plans! As I also would scale the investments to do them, then all can fall back into living local w/reality holding themselves and others accountable, locally and afar! Actually getting one's needs met and offerings shared as no more people chase delusions, rather people give-gain support as they see our work in progress sharing Humanity's solutions, so now people rethink realizing w/working together for local plans, prioritizing collective local plans, now we all awaken to our consciousness of being one w/the universes! Along w/earth-space message board, so solutions get shared for earthlings as well intelligent beings in space, if they do exist as Dr. Steven Greer has informed me, as well in sharing his recent; <https://ce5film.com/>

Why do I share Steven's work is because I really want to transcend from where modes I've been there done that w/investments having no clue what ecology even was or our true sustaining enhanced energy or how to maintain it! Plus why should we all go 5 steps forward and 3 back, if as he says energy exists and we can get it? I know how my man in ast as we traveled via sailboat w/solar that I see is dark and created inefficiently, fuel cells that need more support to be cheaper, perpetual energy machines that seriously I saw large fossil fuel companies want to work, but sadly they didn't, yet to be developed, and I'm speaking of Depalma's, as well other means to not be toxic, etc. as well water desalination which every community now near salt water could build as well filter dirty, etc. Humanity has solutions but many losses of profiting or programming and manipulators sell toxic to those other countries without knowing or good policies in place and we want to change all of this! We've seen some real horror whores! So now we want to share solutions and we trust no matter how we've we must work at change and it is for the benefit of each!

What I see now is people need empathy and kindness and to lay out detail on both sides of a peace platform, Ex; why would a country needing medicine take toxic pharma and it's baggage attached from profiteers, when Functional Medicine has created nice tests to define micronutrients missing as well knowing whole foods and or supplements heal most efficiently, and believe I just again 2 days ago lost a sister in law w/errors within her as well Drs of western medicine, and we can go beyond this and learn early signs, lowering our footprint, and healing locally w/own medicinal and food gardens w/out toxic connections, ending false aid from afar!

I could show you a list of these errors in US Gov-Ed-Medicine-Judicial-political-religious, etc. this list is long, as well small patches on earth w/solutions, so it's time to get real, not get lost in the dysfunction or disassociated energy, rather stay focused and that too will be redirected correctly! We can end these scars from being repeated as they have been, w/your help, caused by inability to rewire and work w/truth shared as we start gathering means to link as well the message boards working efficiently!!

Same grains traveling across planet as ships turn over daily, as well farmers mishaps and loses, as well controlled seeds as in GMOs or other toxic processing, as in Cargill and Monsanto doing so much damage in the Amazon as well on earth yet many still buy their products having no clue of how they profit? And now can, soon as we get platform transitioned w/your help! When Functional Medicine has researched new biology going back to ancient ways that work best for earthlings! I share that link also of Sayer J's research and his new book on our site, as well the take of COVD 19 falsely reported by CDC and WHO, US Gov And others again w/misinformation! Why grow and struggle w/wheat-rye-barley, when it is proven to be toxic thru processing or genetic interference as well buckwheat-amaranth-quinoa are better if they do grains and again depending on illness perhaps no grains to heal!

Even folks I respect to scale agroecology with, have learned we need to change nutritional understandings. Functional Medicine has turned the nutritional pyramid upside down, as well knows well what is toxic and who is profiting over it! For as I told Wal-Mart the other day as I go

regularly to view progress and I saw a Vega.org on label, as monk fruit extract had maltodextrin, why?? Look it up it's toxic and to some illnesses worse!

When people eat some of these preservatives they seriously get addicted plus want to eat more, so some of these people are so large w/terrible sores from diabetes and more! I've changed pads w/open sores unable to close! Yet these people or drs have no clue, so in this local plan we worked, we have plans to share more to every local plan! SO no more sanctions like w/these products end up as together change policies to stop them from being produced!

Same w/vaccines, as I see what Bill Gates is pushing now w/corona virus and he is wrong! Sady parents w/beautiful children being scarred from these present vaccines never realized until Functional Medicine has helped heal like autism from them!

So why the footprint of being interdependent when all can transition w/neighbors ending this false aid from afar as well misinformation! So every sanction would have a local solution to not allow it to affect any life! Same people get real and not support those ways understanding they are from programing of the past and this is how I feel thru understanding of each detail w/skilled intermediaries, we then can aid this peace understanding, as in where locals can't make change perhaps people afar joining in can! This too will be an alert page asking critical thinkers to help reach out!

Ex; this leader or rep has an inner or inter personal issue, or this one is not understanding how the continent is supplying toxic or goodness, as Ex; life death of compounds circulate earth as in sands from desert to Amazon rainforest to nurture so as to give all life including Humans daily tools for us all to do one's organic exchanges and create these natural balanced genetic bio diverse communities, to naturally link w/neighbors!

This is our true energy source and Humanity on earth and in space has solutions for more!

The true pandemic is lack of education as well organizing to communicate, which the tools of the times are here now to be perfected. I've used Google's AdGrant since 2014 to reach out to almost every country they legally can, and we want with your help to reach those they can't, and create with us, using what you all can, and further develop these plans, knowing they work!

Issues of the times are long overdue no matter what you title these priorities as, the good stewards of the planet still living these ways know well we can create good technology and save lives, as well have yearly water vs not, seed exchanges and ancient ways to create that which Humans do best with! Not to mention basic comforts and that is our main focus!

Also I have a desire to communicate more w/those communities boon w/theri transboundary migration of large browsers, or restoring them, so if know of those contacts, I would appreciate you sharing me with them or them w/me, for I have a feeling of where their knowledge can help more understanding!

It is underlying illnesses that are killing even though one may have coronavirus. Ex; Italy 99% have been found to be over 78 years old and had 1-3 underlying diseases that killed them!

Pres trump asked me to manage his Pres Campaign last year, and I said our project is better than his, but I do believe if we don't ourselves stay in real time working w/Govs they never will correct themselves getting out of their own way, so we need each other! and I feel these scars can end forever where toxic Industrial Military and Agriculture can end along w/Nuclear and more as all gain some understanding from the many that have solutions now! Even now I asked him before I signed your petition a few things as well, I wanted to hear more in response to this email!

I'm seeing too much misinformation in skilled positions that I feel can be corrected on both sides! Or please set me straight?? Plus I want to apologize if you felt I was misleading in this time sensitive Humanitarian funding for these people have really gone out of their way to see that I still get this funding! So it is out hands, and I'm sorry we did not get it earlier as I told a few of you, for the first error came from my Schwab broker where I had prepared for our non profit to receive it, and what happened was a broker gave me the wrong wire information and then it got lost. So this last year and half has shown me never before how a huge Corps makes big mistakes and they gave \$100. saying sorry, then a list of issues there after human errors, that I had to take part in resolving to get my own ass out of their issues? So I survived by gaining empathy and seeing the many solutions now as we continued and you can too!

Please note you have choices! You can learn and do more for you! You can Donate at; www.ictts.org, you can share us along your path as you walk it, into your opening, you can share in solidarity and come link, you can create for your communities w/our plans, you can start welcoming your students skilled to focus direct w/you and us, as you start your local plan and gather investments as you prioritize wus on the collective local plans then on to yours?? Or you can give me a loan w/good return, so we can get this done faster, reaching out to all! Thank you for adding to this list by sharing more!

Sincerely, I appreciate your attempts to aid Humanity and I'd like to join that priority!

farmwuwei@gmail.com

Ps I'm emailing from this email due to, let me repeat for I want to respect Google's assoc w/their AdGrant! I cannot profit on my Google AdGrant site, but I can from this site email, fund raise for ictts.org, I just can't be talking about profits on my nonprofit site, as in my attempt to get a loan to receive this large Humanitarian fund to me as a person, as I decided to have it given to me vs my nonprofit, due to I trust me more than the US Gov! And the Gov that is giving me this fund and letting me decide wants me to do as I see fit, they respect our work and I respect theirs in progress with us, due to working w/them now for over a year to end the Yemen war as they and I are working to make our ideas happen!

So your suggestions are appreciated, for we are doing our plans anyhow slowly, due to Human errors on my end that snowballed on me, this last year, but this fund could help it happen faster as well we want to give our platform to the world to make these changes ASAP addressing the local plans left behind too long, but attaching the collective local plans as we prioritize for the lessons as well as the negative effects on earth-space to stop via good investments! As well work to better prepare as in the many being negatively affected due to the bad technology they have now and I feel working creating w/us and links I share now on iccts.org site, w/us scaling investments w/agroecology w/Emeritus Professor Miguel Altieri and his group affiliation w/SOCLA scientists, as well Emeritus Professor Guy Mcpherson and his team, many more will gain this clarity to come aboard and make much more happen!
