

Job Title: Front-End Mobile App Developer (React Native)

Location: Remote

Employment Type: Full-time

We're a new deep stealth startup

We're looking for a talented **Front-End Mobile App Developer** with a passion for building sleek, high-performance mobile applications. If you thrive in a fast-paced environment, enjoy solving complex problems, and want to work with cutting-edge technology, we'd love to meet you.

Responsibilities

- Design, develop, and maintain cross-platform mobile applications using **React Native** for both **iOS** and **Android**.
- Collaborate with product managers, designers, and backend engineers to deliver high-quality user experiences.
- Optimize app performance, responsiveness, and scalability.
- Implement pixel-perfect UI based on design specifications.
- Integrate third-party APIs and native modules as needed.
- Participate in code reviews, testing, and deployment processes.
- Maintain high standards for code quality, documentation, and security.

Required Qualifications:

- Strong proficiency in **React Native**, **JavaScript/TypeScript**, including experience with native modules and bridging.
- Experience deploying and maintaining apps in the **Apple App Store** and **Google Play Store**.
- Solid understanding of modern mobile UI/UX principles.
- Familiarity with state management libraries (e.g., Redux, Zustand, Recoil).
- Knowledge of RESTful APIs and asynchronous programming.

Bonus / Preferred Experience:

- Backend development experience, particularly in:
- Building **scalable server environments** (e.g., containerized infrastructure).
- **Python development**, including Flask, FastAPI, or Django.
- Working with or integrating **AI/ML infrastructure** (e.g., PyTorch, inference APIs).
- Familiarity with CI/CD pipelines and mobile app release workflows.
- Understanding of data privacy, security, and compliance standards.

What We Offer:

- Competitive salary and equity options.
- Flexible work hours and location.
- Opportunity to work on impactful, innovative products.
- Supportive and collaborative team culture.

To Apply:

Send your resume, a brief cover letter, and links to your GitHub or portfolio to jerel.lim@decode.build. You will be connected to Jennifer after.
