

March 2024 – EMS Venture Core- Math Student-Led Conferences

DISCUSS the following with your Parents/Guardian during the conference: Look back through your Work Habit and Content assignments grades; Are you progressing/improving? Are you using the reviews that you can reference on test day? If the material is challenging, do you come in for help, are you asking questions in class or calling reliable friends for help? How can we improve on some of these strategies to help content and work habit math scores?

After the discussion about math, please fill this out during your conference.

Does your grade represent what you have been doing in class and at home?

Yes, I think my grade does reflect what I am doing because its an 88 and that is pretty good even if I don't do good on some tests.

What do **YOU** want your grade to be in math by the end of the semester? Why?

I want my grade to be an A because I'm at a B right now and I want to raise my grade so I can hopefully get into honor role.

How are you going to achieve this goal? How can Mr. Tuke help you succeed?

If there are any questions about what was discussed please call Mr. Tuke over once he is free from talking to other parents.

Thank parent/guardian for coming!
