

PicFinder

PicFinder is an AI-powered image generator that allows users to input text descriptions. The technology behind it is capable of transforming a user's description into images. Users can control the size of the images they generate, with options for square, tall, and wide.

To-Teach

To-teach uses AI to generate exercises, worksheets, and lesson plans. The free version allows users to create 5 exercises, 3 worksheets, and 2 lesson plans per month. There are a variety of different types of exercises users can choose from including multiple choice, sorting processes, and creating cloze tasks using wikipedia integration.
