Nevada Anti-Propaganda Protection Act (NAPPA)

This initiative prohibits Nevada government agencies, employees, contractors, and public entities from creating, funding, or distributing propaganda, psychological operations, or narrative manipulation targeting residents of Nevada. It bans the use of AI-generated content, behavior modification tactics, or federally coordinated influence campaigns unless explicitly disclosed.

The measure further restricts political action committees (PACs), donors, and other entities from using misleading or AI-altered content in election advertisements. All paid election communications must disclose top funders, origin, and whether the message was federally influenced or AI-generated.

Violations by individuals or entities may result in civil penalties, removal from public office, public disclosure, and temporary or permanent bans from participating in Nevada elections.

The initiative establishes transparency requirements for all public media contracts and creates a five-member citizen-led oversight board to enforce compliance and investigate public complaints. Whistleblowers who expose violations may receive financial compensation and legal protection.
