

Weekly Agenda Jan 3rd

Today's development agenda: <http://bit.ly/2Q9LN1C> | Hangout: <http://bit.ly/2SzVRmF>

YouTube Live event: <https://www.youtube.com/watch?v=eLxrfpUUCho>

Note: If you join our hangout, *you will be recorded, and broadcast live*. The video will also be published to *YouTube* after the meeting ends. If you are not comfortable with your video being recorded, you can turn off your camera and/or, or watch the meeting via the livestream instead.

To watch only: <http://www.youtube.com/user/backdropcms>

If you join the hangout **please mute yourself** when you are not speaking. The YouTube video recordings can be hard to watch with background noise or when the focus accidentally shifts.

Contributed project updates

- New projects: [ZURB: TwentyTwenty](#)

Website related development tasks

1. Backdropcms.org Update
 - a. Modules / Themes / Layouts and related changes [#442](#)
 - i. Status: underway
2. Forum site update:
 - a. Problems with node (topic) preview (out of memory errors) [#68](#)
 - i. Status: Fixed! (Thanks [@hosef!](#))

Backdrop CMS Project Progress Report (update from [@quicksketch](#))

- **Items for 1.11.4**
 - Drupal 7.60-7.61 commits [#3375](#)
 - Status: Completed merging all remaining issues. ALL MERGED!!!
 - Other things that need us to work on them include:

- [Add predefined color schemes to Basis](#)
 - [\[UX\] Installation requirements page looks broken](#)
 - [Core Updates failing due to missing module 'type' in *.tests.info file](#)
 - [\[UX\] FIX RTL Formatting](#) (lots of these!)
- See the [Github issue tracker for 1.11.4 issues](#)
- **Items for 1.12.0 ~ January 15th, 2019**
 - Add a class to a link in ckeditor [#3307](#)
 - Status: Merged!
 - Tags for modules [#37](#)
 - Status: Merged!
 - Core Updates [META] [#2018](#)
 - Enable UI for core updates [#3271](#)
 - Status: Merged! Core updates are disabled by default.
 - Package signing [#1992](#) (in progress)
 - Status: No updates.
 - Config translation [#704](#)
 - Status: Initial work merged! APIs now available.
 - Add translatable strings to core files: [#3455](#)
 - Potx extract strings issue: [potx #9](#)
 - Other nice things merged this week:
 - Views uses CSS Grid: [#2811](#)
 - Views arguments from URL: [#2878](#)
 - Scheduled content now indicated on Content Listing: [#3145](#)
 - See the [Github issue tracker for 1.12.0 issues](#).
 - 12 remaining issues in 1.12.0 release. Most UX issues and minor cleanups.
 - For those looking to work on things to get into 1.12.0, also check the [1.11.4 milestone](#), which has ~50 issues in it.
- **Items for 1.13.0 ~ May 15th, 2019**
 - Dashboard! [#495](#)
 - Status: Moved to 1.13.
 - Fieldable File Types [#2632](#)
 - Status: Moved to 1.13 - or possibly only parts of it?

1. See <https://backdropcms.org/roadmap>

General Discussion / Open Q&A

- How to (better) manage milestones
 - **docwilmot**: I'd like to propose a new tag for issues: "Milestone suggestion" or something similar. And to get an issue into a milestone should require someone apart from the proposer of the milestone to agree and insert a milestone label on the issue. We've got too many things being automatically labelled Milestone XXX, with a just couple of core committers to sift through all that.
 - Update we have a new tag to try called [status - milestone candidate](#)

[end broadcast - Thanks everyone!]

Discussion(s) after broadcast ends:

- TBD
