

SAMPLE FIELD NOTES

Common Name : **Malay Eagle Owl / Barred Eagle Owl**

Class: **Aves** Order : **Strigiformes** Family: **Strigidae**

Genus & Species: ***Bubo sumatranus***

Date: **13 July 2013** Time: **4.30pm**

Place: **Housing area in Taman Equine, Seri Kembangan**

Length : **50cm** Width: **30** Wingspan (birds only): **Approx 1.2-1.5 meters**

Observation and Field Notes:

This was an adult owl guarding its offspring on another tree nearby. It was there for almost the entire day and was awake throughout that time. At night, it would give hoot once every minute.

Common Name : **Wagler's pit viper**

Class: **Reptilia** Order : **Squamata** Family: **Viperidae**

Genus & Species: ***Tropidolaemus wagleri***

Date: **7 June 2015** Time: **6.00pm**

Place: **Housing area in Taman Equine, Seri Kembangan**

Length : **80cm** Width: **2.5cm** Wingspan (birds only): **Not applicable**

Observation and Field Notes:

Juvenile snake clinging unto the fence and netting. It was very passive and not very fast moving. In fact, it was still for hours in the same position, even when there was human presence nearby.
