This book series has many wild and adventurous journeys. Whether you travel around in your town or all around the country. This book series includes five books that are amazing. The second book is the best but this whole series is spectacular. I think every middle school student should read this series. The Song of Achilles
by Madeline Miller

Recommended by: Erin

After being exiled from his own kingdom, Patroclus goes to Phthia and becomes very close with Achilles, the prince of Phthia. Achilles is half god, and has a prophecy to become a great warrior. *The Song of Achilles* takes place in Ancient Greece and also talks about Greek mythology, something I really like. This book is basically *The Iliad* from Patroclus' point of view.

It's rated for teens.

The Knife Of Never Letting Go
By Patrick Ness

Prentissstown is a town full of only men but this isn't the only reason its not like every other town. The people in it can hear each others thoughts in an overwhelming stream of noise with no way to turn it off. One day, while in the wood, he hears silence, something he has never experienced. When his caretakers hear of this, they rush him out of the town. Todd must now run away from his town, from the secrets it holds because everything he had learned about his town was false. But how can you run away when the people chasing you can hear your every thought? What are the secrets the town holds? This series is a trilogy and is dystopic.

This book would be considered "restricted" due to some adult situations, language, and violence.

I Hunt Killers Series
By Barry Lyga

Recommended by Casey

In this book the main character's dad is a serial killer. He is currently locked up at a secure prison and that he can't escape from. Mysteriously new bodies start showing up and they are impressionized to be like his dad's first murders. He then hunts the killer. I would say this book and the later series to be more graphic and violent.

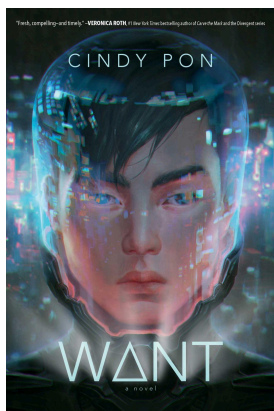

This is a restricted book because of some adult content.

They Both Die at the End

By: Adam Silvera

Recommended by: Genevieve

I really liked this book because the story is told from two different perspectives dealing with the same problem. I also liked this book because of the LGBTQ+ aspect of it so if you enjoy books like that this would be good for you. It also has a bit of action and deals with relationships and has a good balance of both.

The Medic: Miracle on Hacksaw Ridge

By: Adam Palmer

Recommended by: Carson

If you're interested in a true story, if you're interested in World War 2, a book with action, and a book that turned into an Oscar and Golden Globe award winning movie (Hacksaw Ridge). Then the medic is for you. It tells the true story of US army combat medic Desmond Doss and the adventures of his service in the Philippines, Guam, and the Battle of Okinawa during World War 2. He was a conscientious objector which means he doesn't believe in violence. So he was running into battle without a gun to protect himself. I think this book does a great job telling a story of bravery, and sacrifice. This is more of an adult book with little cursing, and violence but it isn't too graphic and I read this book for the first time in the 5th grade so mature kids would be fine reading it.

The Final Four
By Paul Volponi

Recommended by: Wesley

This book takes place in a matchup between the Trojans and Michigan

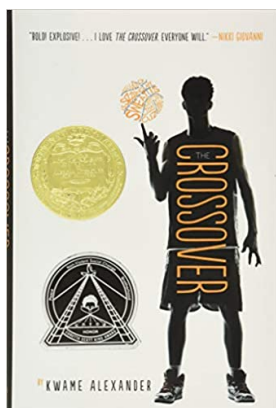

State in a final four game. It goes back into the life of the players while still connecting that to the game. It brings up actual basketball stuff like how the main character is a one and done.

A Series of Unfortunate events by Lemony Snicket is a book about three children that are sent to live with their uncle after their parents died, but were actually sent to a wicked man Count Olaf. Olaf wants the money that the children's parents had. So the three children have to stop him.

I would recommend this book to people that are not really big into reading. But need a book or a book series to read the book is not too long and fun to read.
