SAFETY ALERT

November 9, 2022

Prompt Injury Reporting

In the event of any injury while working at LBNL, immediately notify your supervisor and report to Health Services, (**Building 26 or X6266)** for medical evaluation no matter how minor the injury may at first seem. In the event of a potentially life threatening emergency, always call **911** from any phone for immediate fire department/ambulance response.

Prompt reporting of work related injuries is important for a number of reasons:

- Lack of prompt medical attention can lead to a more severe condition.
- Prompt reporting will result in a faster investigation as to the cause of the accident. Corrective actions can be taken to prevent a similar injury to co-workers.
- It's a lab requirement!

For further information on Health Services operating hours, exams/assessments, and worker injury/wellness, go to the Health Services website: **https://ehs.lbl.gov/service/health-services/**

If you should have any questions about an injury or accident reporting, please contact the ETA Safety Manager, Ron Scholtz at X8137 or rgscholtz@lbl.gov.
