	What's New Before we discuss about ordinal numbers in this module, it is important to understand the following terms used in the course of the lesson. 🎬 Numeral - relating to numbers 🎬 Ordinal - relating to an order 🎬 Superscript - letters written immediately at the right of the character. It is set slightly above the normal line of text. It is usually smaller than the text it was attached. In the symbol 1st, the letters st are written as superscript. 🎬 Point of reference – the point or object in which the order of counting starts To introduce to you what these Ordinal Numbers be like, we can easily cite examples like the alphabet where letters are being arranged in a specific order. Here is a chart of Filipino alphabet from the first to the last letter. How many letters does the Filipino alphabet have? _____  A B C D E F G H I J K L M N Ñ NG O P Q R S T U V W X Y Z The alphabet is composed of letters in a fixed order.
