

# Technical Math Testing Out Student Information

Updated 03/20/2023

## **Textbook:**

- There is no textbook for this class.

## **Format of the Exam:**

- The exam will have at most 50 questions.
- All questions are multiple choice.
- You can show any work on the exam packet, but we will only score your scantron sheet.
- Calculators will be allowed on the exam. (TI-83, TI-84 or similar are recommended). A calculator will be provided for the exam if you need.

## **How to Review for the Exam:**

- You should look at the [Exam Review packet](#) and complete each question. You may want to search for more online resources/practices also to help consolidate your understanding.
- Use resources such as Google or [Khan Academy](#) to help.

## **On Testing Out Day:**

- You will be provided a graphing calculator to use during the exam, if needed. If you bring your own calculator, the memory will be cleared before and after the exam. Any programs you have stored will also be erased.
- You may **NOT** bring any notes/notecard to use on the exam.
- No formulas will be given on the exam. If you need them, you must memorize them.
- You will have 90 minutes to complete the exam.
