

Julian Valle - Full Stack Developer

New York, 11102 | 805-825-8686

Email: hello@julianvalle.dev | LinkedIn: linkedin.com/in/julian-valle | Portfolio: julianvalle.dev

OBJECTIVE

Senior Full Stack Developer experienced in building scalable SaaS applications with React, TypeScript, and .NET. I have spent years using Next.js to build end to end workflows and have a strong grasp of its architecture, performance patterns, and tradeoffs. Passionate about using AI and modern front end frameworks to deliver performant products.

SKILLS

Core Stack: Next.js, React, TypeScript, .NET, C#, SQL Server, Azure

Frontend Expertise: Next.js, React Query, TanStack, React Hook Form, SCSS, Tailwind, Storybook

Backend & APIs: Node.js, RESTful Services, GraphQL, Microservices Architecture, Docker

Testing & DevOps: Jest, Cypress, CI/CD (Azure DevOps, GitHub Actions), Git

Additional: AI Integrations, Accessibility, Performance Optimization

EXPERIENCE

Full Stack React / .NET Engineer | InfoTrack

May 2024 - Present | Hybrid | New York, NY

- Led the **redesign and migration** of InfoTrack's flagship **Court Filing platform**, used by **40,000+ legal professionals** across **1,500+ courts nationwide**.
- Migrated a **legacy ASP.NET MVC monolith** into a **.NET 8 microservices architecture** with a **React + TypeScript** frontend, improving scalability and performance.
- Integrated **AI-powered document extraction**, cutting legal form processing times from **1 hour** → **30 seconds** and reducing **rejected filings by ~50%**.
- Rebuilt **dynamic, state-specific forms** using **React Hook Form, Yup, and React Query**, improving data validation
- Designed optimized **SQL Server schemas and queries** to enhance filing workflows and cross-state automation.
- Delivered **RESTful APIs** with **Swagger/OpenAPI** and enabled seamless integration with **Clio, LEAP, and MyCase**.

Full Stack Software Engineer | Active Logic

May 2022 - March 2024 | Remote

- Migrated a legacy **Knockout** codebase to a modern **Laravel + Vue 3 SPA** for 8,000+ users, improving maintainability and long-term scalability.
- Collaborated with the Church **CMS** team to enhance donation and scheduling features while transitioning the front end from **Knockout** to **React**.
- Integrated **Mailchimp's REST API** to automate marketing campaigns, boosting donor engagement.
- Built data visualization tools with **HighCharts** and **ArcGIS** for EKC, delivering insights for 500,000+ businesses.
- Optimized database queries and schema design in **MySQL**, enhancing data performance across features.

Front End Developer | Enovational

June 2020 - May 2022 | Remote

- Developed the front end for **Maryland's licensing portal in React**, ensuring accessibility for **50,000 users**.
- Built and optimized **PostgreSQL-backed dynamic forms and templates** using **HTML** and **Ruby on Rails**, powering **500+ daily active forms**.
- Created a **WYSIWYG form builder** with **Vue.js** and **Ruby on Rails**, streamlining forms for government employees.
- Established a **reusable component library** using **Storybook**, improving front-end development efficiency.

EDUCATION

California State University Fresno - B.A. Psychology - 2014
