Julian Valle - Full Stack Developer

New York, 11102 | 805-825-8686
Email: hello@julianvalle.dev | **LinkedIn**: linkedin.com/in/julian-valle | **Portfolio**: julianvalle.dev

OBJECTIVE

Senior Full Stack Developer with extensive experience building scalable SaaS applications using **React, TypeScript, .NET**. Passionate about leveraging **AI, modern frontend frameworks, and backend optimizations** to deliver impactful, user-focused solutions.

SKILLS

Front End: React, Vue, TypeScript, Next.js, SCSS, Tailwind, Bootstrap, React Query, TanStack, Yup, Storybook
Back End: .NET, C#, Node.js, REST APIs, GraphQL, Laravel (basic), PHP (basic), MySQL
Testing & Tools: Jest, Cypress, ESLint, Prettier, Git, CI/CD (Azure DevOps, GitHub Actions), Vite, Webpack
Other: Azure App Services, SQL Databases, Docker

EXPERIENCE

Full Stack React / .NET Engineer | InfoTrack

May 2024 - Present | Hybrid | New York, NY

- Led the **redesign and migration** of InfoTrack's flagship **Court Filing platform**, used by **40,000+ legal professionals** across **1,500+ courts nationwide**.
- Migrated a **legacy ASP.NET MVC monolith** into a **.NET 8 microservices architecture** with a **React + TypeScript** frontend, improving scalability and performance.
- Integrated **AI-powered document extraction**, cutting legal form processing times from **1 hour → 30 seconds** and reducing **rejected filings by ~50%**.
- Rebuilt **dynamic, state-specific forms** using **React Hook Form**, **Yup**, and **React Query**, improving data validation and user experience.
- Designed optimized **SQL Server schemas and queries** to enhance filing workflows and cross-state automation.
- Delivered **RESTful APIs** with **Swagger/OpenAPI** and enabled seamless integration with **Clio, LEAP, and MyCase**.

Full Stack Software Engineer | Active Logic

May 2022 - March 2024 | Remote

- Migrated a **legacy Knockout codebase** into a **Laravel + Vue 3** SPA for **8,000+ users**, improving maintainability and long-term scalability.
- Integrated **Mailchimp's REST API** to automate marketing campaigns, boosting donor engagement.
- Built **data visualization tools** using **HighCharts** and **ArcGIS** to display insights for **500,000+ businesses**.
- Implemented **CI/CD pipelines** and automated testing, improving deployment reliability.
- Optimized database queries and schema design in **MySQL**, enhancing data performance across features.

Front End Developer | Enovational

June 2020 - May 2022 | Remote

- Developed the front end for **Maryland's licensing portal**, ensuring accessibility for **50,000 users**.
- Built and optimized **PostgreSQL-backed dynamic forms and templates** using **HTML** and **Ruby on Rails**, powering **500+ daily active forms**.
- Created a **WYSIWYG form builder** with **Vue.js** and **Ruby on Rails**, streamlining forms for government employees.
- Established a **reusable component library** using **Storybook**, improving front-end development efficiency.

EDUCATION

California State University Fresno - Fresno, California

- *B.A. Psychology - 2014*
