

# Ofelquis Gimenes

Hi, I'm a Web Developer. I started studying web development in 2010, landed my first job in 2012, and began transitioning to backend roles with Node.js by 2017. Currently, I work as a JavaScript Full Stack Developer, building and delivering end-to-end web applications that integrate frontend and backend functionality

## EXPERIENCE

### jpg.store Remote — Front-end Web Developer React

Ago 2022 - Nov 2024

Contributed to developing a leading **Web3 NFT marketplace**, focusing on responsive design, front-end reliability, and seamless integration of modern tools and technologies.

- Built and enhanced a **Web3 marketplace experience**, focusing on responsive design, pixel-perfect CSS/HTML implementation, and improving components based on **Figma UI files** using **React** and **TypeScript**.
- Developed tools enabling users to **create collections**, **publish NFTs**, and **transact items** via **Cardano blockchain wallets**, including a UI for bulk actions to buy or sell multiple NFTs efficiently.
- Recognized internally for **mastery of CSS** and meticulous **attention to detail**, delivering responsive and adaptive styles optimized for cross-browser compatibility and diverse screen sizes.
- Created reusable components to **accelerate feature development** and ensure **design consistency** across the platform, complete with **Storybook documentation**.
- Maintained **dark/light mode** using CSS custom properties, ensuring a cohesive user experience in both themes.
- Collaborated closely with designers to translate **high-fidelity Figma designs** into production-ready code, aligning UX/UI goals with technical requirements.
- Advocated for best practices in **ESLint**, **TypeScript typing**, **CSS/HTML standards**, and **React** through **PR reviews**, meetings, and knowledge-sharing sessions.
- Documented and tracked issues in **Linear.app**, providing clear reproduction steps to streamline debugging and resolution.
- Kept the codebase up-to-date with the latest **Next.js releases**, ensuring improved performance and compatibility.

**Key Tools & Skills:** Next.js, TypeScript, React, TailwindCSS, Responsive Layouts, Radix-UI, Zod, Zustand, React Query, Shadcn, React Spring, Lottie, Design Systems

### pedra.app, Miami FL — Remote Front-end Web Developer

JUN 2021 - Ago 2022

Designed and implemented a responsive call center platform for mobile and desktop using React, Next.js, TypeScript, and GraphQL

- Designed and implemented a **responsive call center platform** for mobile and desktop using **React**, **Next.js**, **TypeScript**, and **GraphQL**.
- Integrated tools like **Twilio TaskRouter Client** for managing tasks and creating a fully operational **call dialer**, enhancing productivity and usability.
- Built payment flows with **Stripe Elements** and contributed to overall UX/UI with **TailwindCSS** and **Chakra UI**.
- Transitioned to a **full-stack role**, taking ownership of backend development, managing deployments, and implementing new features.
- Developed backend solutions using **Node.js**, **Prisma**, **PostgreSQL**, and **Redis**, including a complete integration with **Twilio A2P** messaging APIs.
- Collaborated in a **small, focused team** (2 developers, 1 product manager), managing the full development lifecycle, from planning to deployment.
- Modeled new features, ensured system reliability, and maintained both frontend and backend stacks.

**Key Tools & Skills:** React, Next.js, TypeScript, Node.js, GraphQL (Nexus/GQty), Prisma, PostgreSQL, Redis, Stripe APIs, Twilio APIs, TailwindCSS, Chakra UI

## **getrak.com.br**, Belo Horizonte MG — Remote Front-end Web Developer

FEV 2021 - JUN 2021

Developed and maintained **GConnect**, a React Native app for iOS and Android focused display vehicle tracking data

- Developed and maintained **GConnect**, a React Native app for iOS and Android, implementing new features and progressively modernizing the application.
- Enhanced **accessibility** by implementing adaptive font sizes based on the user's operating system settings using **React Native**.
- Integrated **Google Maps** with support for marker clustering to improve map performance and usability.
- Added smooth **animations** using **React Native Reanimated**, creating a more engaging user experience.
- Updated project dependencies to ensure compatibility and improve maintainability.
- Managed iOS/Android builds, including release cycles and distribution through respective tools.

**Key Skills:** React Native, React, REST APIs, Google Maps, Accessibility, Responsive Design, React Native Reanimated, Design System Integration

## **provi.com.br**, São Paulo SP — Remote Front-end Web Developer

SEP 2020 - NOV 2020

Worked on improving Provi's platform, which facilitates easy student loan applications, focusing on enhancing user experience, resolving technical issues, and implementing new features to streamline the loan process.

- Unified **Google Analytics accounts** across all 7 product entry points, enabling **cross-device tracking** and implementing specific events to track conversions.
- Identified and resolved **file upload issues** affecting users in mobile scenarios, improving functionality and user experience.
- Developed a **digital contract signing interface**, streamlining the customer onboarding process.
- Polished and enhanced UI responsiveness across devices, focusing on **mobile layouts** and **user accessibility**.
- Collaborated closely with peers, providing **JavaScript and Web Platform expertise** to help unblock development challenges.

**Key Tools & Skills:** JavaScript, React, Styled Components, Node.js, REST APIs

## **vai.car**, São Paulo SP — Front-end Web Developer

FEB 2018 - SEP 2020

Vai.car was a car rental company for app drivers like Uber and 99 in Brazil. I worked on the front-end development of their platform, focusing on enhancing the user experience during the vehicle rental and document submission processes.

- Developed and maintained the **product website** and **internal operational dashboard**, delivering responsive and user-friendly interfaces.
- Worked closely with a team of 10 professionals, including developers, designers, and product managers, in a **70-person startup**, to continuously enhance both employee and end-user experiences.
- Implemented **development standards and best practices** to ensure scalable and maintainable front-end solutions.
- Integrated **REST APIs** and developed reusable components using **React** and **Storybook**, streamlining feature development.
- Contributed to the testing and reliability of the platform with **Jest**, ensuring quality across releases.
- Focused on building an excellent **mobile-first experience**, aligning with market and operational demands.

**Key Tools & Skills:** React, Storybook, Jest, REST APIs, Responsive Design

## Pagar.me, São Paulo SP — Front-end Web Developer

JUN 2016 - DEC 2017

Worked on a **fintech customer dashboard and checkout experience**, focusing on improving usability, scalability, and cross-platform compatibility.

- Contributed to the **development and optimization of the transparent checkout**, improving the **mobile experience** for seamless user transactions.
- Enhanced and maintained the **client dashboard** and **internal operations dashboard**, implementing new features and addressing user pain points in a legacy **AngularJS** environment.
- Played a key role in the **early design and development** of a new client dashboard using **React**, aligning **UX/UI design** and functionality for a future-proof solution.
- Debugged complex **cross-browser issues** on both **mobile and desktop**, ensuring compatibility and delivering a consistent user experience.
- Collaborated in a **fast-growing company** that quadrupled its client base during my tenure, adapting to evolving requirements and contributing to scalable front-end solutions.
- Partnered with stakeholders across departments to identify customer challenges and prioritize impactful changes, fostering collaboration between technical and non-technical teams.
- Helped lay the foundation for open-source projects, including a new **dashboard** and **checkout**, prioritizing **accessibility**, scalability, and maintainability.

**Key Tools & Skills:** AngularJS, React, JavaScript, HTML, CSS, Cross-browser Debugging, Responsive Design, UX/UI Design, Open Source Contributions

## Mãeguru Social Network, São Paulo SP — Front-end Web Developer

NOV 2014 - AUG 2015

Mãeguru was a **social media platform designed for moms**, providing a safe and supportive space for mothers to connect and help each other. I joined during its early stages, working closely with investors and the team to define and build the platform from the ground up.

- Built and maintained the **hybrid mobile app** for **iOS and Android** using **PhoneGap/Cordova** and **Ionic**, gaining first-time experience publishing apps to the App Store and Google Play.
- Developed responsive web interfaces using **HTML**, **CSS**, and **JavaScript**, ensuring compatibility and a seamless user experience across devices.
- Leveraged **AngularJS** for front-end development, creating dynamic and interactive components.
- Collaborated in a **dynamic startup environment**, adapting to evolving requirements and contributing to the platform's growth from concept to product.

**Key Tools & Skills:** Cordova/PhoneGap, Ionic, AngularJS, HTML, CSS, JavaScript, Hybrid Mobile Development

## Tribo Interactive, São Paulo SP — Front-end Web Developer

MAR 2013 - AUG 2014

Tribo Interactive is a **marketing agency** specializing in creating interactive websites, hotspots, and marketing campaigns for major clients across various industries. As part of a multidisciplinary team, I contributed to delivering high-quality,

responsive solutions for well-known brands.

- Developed **responsive layouts** and **interactive hotsites** for clients such as **Clear, PayPal, Vale, Itaú, SESC, OMO Unilever**, and **CIF** cleaning products.
- Created **email marketing campaigns** tailored to multiple devices and international audiences, utilizing **Gulp** and **Moment.js** for efficient time zone and localization handling.
- Implemented **animations using JavaScript and CSS3**, enhancing user engagement and creating dynamic content experiences.
- Collaborated closely with designers, copywriters, and other developers to ensure seamless integration and alignment with client objectives.

**Key Tools & Skills:** JavaScript, CSS3, HTML5, Gulp, Moment.js, Responsive Design, Internationalization, Email Marketing

## Extraball Underdogs, Curitiba PR — Front-end Web Developer

NOV 2012 - FEB 2013

Extraball Underdogs specializes in developing, implementing, and optimizing e-commerce layouts to enhance online store performance and increase conversions. I worked on creating and improving interfaces for e-commerce platforms, collaborating with well-known brands.

- Developed and maintained **e-commerce websites** built on the **Vtex platform**, ensuring high performance and usability.
- Contributed to the maintenance and feature development of sites for clients like **TIM, RIHappy, PetLove**, and others.
- Focused on **responsive optimization**, enhancing cross-device compatibility for seamless user experiences.
- Implemented advanced **DOM manipulation** and interactivity using **JavaScript** and **jQuery**, aligning with client goals and industry standards.
- Utilized **Git** for version control, ensuring collaboration and efficient code management.

**Key Tools & Skills:** JavaScript, jQuery, Advanced DOM Manipulation, Vtex Platform, Responsive Design, Git

## ICOMP, Londrina— Front-end Web Developer

DEC 2011 - NOV 2012

ICOMP is a **marketing agency specializing in promoting and launching music artists in Brazil**, providing services like websites, social media graphics, album covers, and marketing campaigns. I collaborated closely with the design team to deliver interactive and visually engaging web experiences for renowned Brazilian music artists.

- Developed websites for popular artists such as **Luan Santana, Michel Teló, Conrado e Aleksandro**, and **Bruninho e Davi**, translating **UI designs** into interactive and responsive web interfaces.
- Led the **transition from an Adobe Flash-based MP3 player to an HTML5 player**, modernizing the music streaming experience and aligning with web standards.
- Introduced **Single Page Applications (SPA)** to improve navigation and performance across the company's web projects.
- Implemented animations and interactivity using **JavaScript**, enhancing user engagement and creating dynamic content experiences.
- Worked with **HTML5, CSS3, SASS/SCSS**, and modern front-end tools like **Gulp** and **Grunt** to optimize development workflows.

- Collaborated with designers and backend developers to ensure cohesive and efficient implementations.

**Key Tools & Skills:** HTML5, CSS3, JavaScript, SASS, SCSS, Gulp, Grunt, Parallax, AJAX, Git, SVN

## SIDE PROJECT

### tutsmais.com.br — Founder & Technical Blogger

DEC 2010 - MAY 2016

TutsMais.com.br was a **WordPress blog dedicated to web development**, where I shared tutorials, insights, and best practices on technologies like HTML5, CSS3, JavaScript, and Node.js. The blog became a valuable resource for developers, achieving an average of 700 daily visits and featuring guest contributions.

- Created, set up, and hosted the blog independently, managing all aspects of **WordPress development** and hosting infrastructure.
- Published technical articles and tutorials on **web development topics**, including **JavaScript libraries**, **CSS**, **HTML5**, and **Node.js**, showcasing expertise and staying updated with industry trends.
- Used the platform to **polish my development skills**, experimenting with new technologies and sharing findings with the broader development community.
- Engaged with an active audience via social media and blog comments, fostering **knowledge-sharing** and community building.
- Improved **content presentation** and **user experience** through responsive layouts and continuous optimization of the WordPress theme.
- Demonstrated initiative, consistency, and dedication by maintaining the blog for over five years while growing as a developer.

**Key Tools & Skills:** WordPress, HTML5, CSS3, JavaScript, Node.js, Responsive Design, Content Management, Web Hosting

### DevCast — Founder & Host

APR 2012 - JAN 2014

DevCast was a **community-driven initiative** that organized live hangouts and webinars focused on **web development** topics. The platform aimed to foster knowledge-sharing and collaboration among developers, featuring live sessions with significant engagement.

- Organized and hosted over **50 live sessions** on **web development**, including topics like **JavaScript**, **CSS**, and industry best practices.
- Grew the platform to reach over **100,000 video views**, with live sessions attracting up to **130 participants**.
- Collaborated with guest speakers from the developer community to deliver high-quality, interactive presentations.
- Managed the scheduling, live hosting, and availability of recordings directly from the live sessions, ensuring accessibility to the content for a wider audience.
- Engaged with the community through Q&A sessions and discussions, fostering a collaborative and educational environment.
- Demonstrated initiative by creating a platform that connected developers and shared valuable insights in real-time.

**Key Tools & Skills:** Webinar Hosting, Community Engagement, Public Speaking, Web Development Topics
