

Chemistry
Unit 1 Objectives

1. Perform metric conversions.
2. Know the metric prefixes: k, c, m, μ , and their meanings.
3. Know the 3 common states of matter and the changes between them.
4. Differentiate between physical and chemical changes.
5. Be able to do density calculations.
6. Know the classes of matter.
7. Know the difference between endothermic and exothermic processes.
8. Use sig figs.
9. Use scientific notation.
