

KACIE'S TECH TIP OF THE WEEK

CHROMEBOOK UPDATES

- Chromebooks need to be powered all the way off at the end of the day.
- Chromebooks are updated automatically at night.
- If they are not powered all the way off they WILL NOT receive the automatic updates.

HOW TO POWER A CHROMEBOOK OFF

Many students are closing the screen or holding the power button down and this does not turn it off completely.

TO UPDATE CHROMEBOOK MANUALLY:

If you are having problems with programs not working properly, the first thing to check is that your Chromebook is up to date. If it wasn't shut down completely it may have missed an update.
