

# Lesson 1 Vocabulary

Definition:	Image:	Example:																								
<b>Demography:</b> the study of population patterns and change	 <p>A line graph showing population growth from 1900 to 2000. The x-axis represents years from 1900 to 2000 in 10-year increments. The y-axis represents population in millions, ranging from 15,000,000 to 45,000,000 in increments of 5,000,000. The graph shows a steady upward trend, starting at approximately 18,000,000 in 1900 and reaching approximately 45,000,000 in 2000. The data points are connected by a red line.</p> <table><tr><th>Year</th><th>Population (Millions)</th></tr><tr><td>1900</td><td>18,000,000</td></tr><tr><td>1910</td><td>20,000,000</td></tr><tr><td>1920</td><td>22,000,000</td></tr><tr><td>1930</td><td>24,000,000</td></tr><tr><td>1940</td><td>26,000,000</td></tr><tr><td>1950</td><td>28,000,000</td></tr><tr><td>1960</td><td>30,000,000</td></tr><tr><td>1970</td><td>34,000,000</td></tr><tr><td>1980</td><td>37,000,000</td></tr><tr><td>1990</td><td>38,000,000</td></tr><tr><td>2000</td><td>45,000,000</td></tr></table> <p>Fuente: IEA (1900-2000)</p>	Year	Population (Millions)	1900	18,000,000	1910	20,000,000	1920	22,000,000	1930	24,000,000	1940	26,000,000	1950	28,000,000	1960	30,000,000	1970	34,000,000	1980	37,000,000	1990	38,000,000	2000	45,000,000	Demographers study topics such as population distribution and population density.
Year	Population (Millions)																									
1900	18,000,000
