Max Fouchee

FFS Assignment 2 April 2022

Brief: You have 15000 to make a 2-3 minute story about the life of the eldest member of your family.

Treatment

Title: The most perfect version

Logline: In a coloured community there is never one side to a story. No one knows what the original story is unless you're lucky enough to ask the person directly.

Plot summary: The film will take place in Garden Village, Maitland. The camera will be positioned in a way that it seems as if the viewer is a person walking down the street. As the person walks down the street, people will be approaching them asking them about their old aunt, Aunty Syble. The story is that Aunty Syble has back pain and needs to go to the hospital. The person already knows about their aunts back pain and is on their way to their aunt's house to accompany them to a hospital. However, the aunt has a habit of telling everyone in the community a different story. As each new person approaches them, they pretend to not know about the back pain. The stories they hear gets worse as they get further down the street.

The character realises through the stories they've been told that their aunt spins stories and spreads them around the community by using guilt and pity.

Key Characters: The camera, the people walking towards the person walking down the street and the old lady.
