

Winter of Code 2.0

GDSC LBCE

Details

1. **Student Name:** Dhairya Ashvin Shah
2. **Mentor Name:** Ashish Pradhan
3. **Project Name:** Main Website
5. **Organization Repository:** https://github.com/Gdsc-Lbce/GDSC_LBCE_Website
6. **Forked Repository:** https://github.com/shahdhairya51/GDSC_LBCE_Website

General Description

Learning Context

When I joined this project with basic knowledge of HTML, CSS, JS. Our project was to make the main website of GDSC LBCE. Our mentor insisted on making the whole website using only REACT JS. Since we all were beginners this situation gave us hands on experience on REACT JS. I also learnt GIT via this open source which has given a boost in my journey. Our mentor helped us learn and guided us throughout the learning process which we successfully implemented.

Difficulties Faced

As discussed above, we all were beginners without knowledge of REACT. So, when we started working on it we faced a lot of syntactical errors, didn't know about different imports and stuff. But we learnt so much during this phase and spent hours learning and solving these difficulties and discussing about faced errors among ourselves as well as with our mentor and together learning was enhanced, new libraries were learnt and we all made it through with a lot of hands on project experience essential for our future.

How likely are you to continue as a contributor to the org? Why?

I am currently in the learning phase and after contributing as a participant to this org made me learn completely new skills and enhanced my experience in the field of open source and development as well. So, I want to reach even greater heights by continuing learning so I believe

in learning by doing so I will have to implement my learnt knowledge to get hands on experience, so I wish to contribute to this organization and fix bugs and add more amazing features from which I will learn, get experience and it will also benefit the community.

Technical Description

Technical Upskilling

If at all anyone wants to contribute somewhere we cannot without having knowledge of GIT functions. so this open source made me learn all about this and made a path for my all contributions. In today's era people are using REACT on a vast scale for frontend development. I got to learn and an opportunity was given to me to work on this framework and scale up my skills. This added experience to my carrier is a boost to my skillset.

Your contributions

Date	Short Description (<10 words)	Link to PR	Status
10/12/21	Discussion and finalizing figma design	https://www.figma.com/file/Ug4bm8mjcNafExTiS5TBnr/GDSC-LBCE?node-id=0%3A1	Accepted
25/12/21	FAQ section	https://github.com/Gdsc-Lbce/GDSC_LBCE_Website/pull/39	Merged
21/1/22	position bug fix which was overlapping all other components	https://github.com/Gdsc-Lbce/GDSC_LBCE_Website/pull/47	Merged
25/1/22	FAQ MODIFIED with various transitions and effects	https://github.com/Gdsc-Lbce/GDSC_LBCE_Website/pull/49#issue-1113883239	Merged

Tasks completed

- Task 1 name: Figma Design**

in the very beginning me and my team mate started discussing on the workflow of the website and put it together in a figma design and finalized the color schema and the content flow till the end.

Figma design -

<https://www.figma.com/file/Ug4bm8mjcNafExTiS5TBnr/GDSC-LBCE?node-id=0%3A1>

- **Task 2 name: FAQ SECTION**

I was assigned this section of the website I took all the questions and using REACT made these sections later I modified it with various colors, transitions etc.

FAQ SECTION- https://github.com/Gdsc-Lbce/GDSC_LBCE_Website/pull/39

FAQ SECTION MODIFIED

https://github.com/Gdsc-Lbce/GDSC_LBCE_Website/pull/49#issue-1113883239

- **Task 3 name: BUG FIXES**

as we were moving ahead I found there were bugs in our website which made components overlap and getting errors after pulling. So I fixed those bugs which sorted this issue in everyone's system.

BUG FIX- https://github.com/Gdsc-Lbce/GDSC_LBCE_Website/pull/47

Conclusion

Acknowledgements

These tasks couldn't be achieved without the mentorship of our mentor Mr. Ashish Pradhan sir. special thanks to all the GDSC organizers for organizing such a great open source event.

Experience with WoC 2.0

I had a great time contributing in WOC 2.0. organizers were so generous, responded to tickets and solved the issues as soon as possible. The process was very smooth. All the beginners like me would have learnt a lot by getting hands on experience on such amazing live projects. My mentor was also very kind and experienced, no matter what always ready to help and guided us by keeping sessions and very cooperative. It gave me immense pleasure to work with industry experts and learn from them. WOC 2.0 will always be cherished by me.
