

SYM08 - The Current Evidence Guiding Global Ophthalmology Practices: Where Are We and How Should We Prepare to Advance the Global Evidence Basis?

Cosponsored by the AAO Secretariat for Global Alliances

Opportunities for working with colleagues around the world have never been greater. As we take advantage of these opportunities to learn from each other and share resources, the need for good evidence-based guidelines will continue to grow. The complex and demanding environments encountered by global ophthalmology programs challenge our familiar standards. Assessing the current state of evidence in this arena and mapping out the best strategy for future development are becoming critical key priorities in this field.

This symposium will help participants to coalesce the currently available evidence for this purpose and propose strategies for the future development of this important resource in global ophthalmology.

Chairs

R V Paul Chan MD

Mitchell V Brinks MD

Date and Time

Saturday, Oct 12, 2019 2:00 PM - 3:30 PM

Location

Moscone Center

Room

SOUTH 152

Topic

Global Ophthalmology

Schedule

2:00 PM	Introduction and General Comments	<i>Mitchell V Brinks MD</i>
2:08 PM	Adapting U.S. ROP and AI Research to India/Nepal/Africa	<i>John P Campbell, MD MPH</i>
2:16 PM	How the United States Can Address Its Population Eye Health Problem With Solutions From Low-Income Countries	<i>David S Friedman MD MPH PhD</i>
2:24 PM	Experience Adapting Aravind Based Research to the U.S. – Barriers	<i>Aravind Haripriya, MBBS</i>
2:32 PM	Adapting Lessons From Overseas to the Problem of Undiagnosed Glaucoma in the U.S.	<i>Joshua R Ehrlich, MD</i>
2:40 PM	Data in the NGO, IAPB and WHO World: How, Why and Where it's Used for Maximum Impact	<i>Victoria M Sheffield</i>
2:48 PM	Teleophthalmology for Glaucoma: What Can the U.S. and Madurai Learn From Each Other?	<i>Alan L Robin MD</i>
