

CHEMISTRY 1 H**10, 11, 12**

Prerequisite – Completion of or concurrent enrollment in [Algebra 2 Honors](#) or teacher recommendation

4169 – 1 unit laboratory physical science

Enrollment Based

Chemistry 1 Honors is an advanced course in which students will investigate the structure, properties and changes that matter undergoes during chemical reactions. Students are instructed in inquiry-based laboratory investigations, the unitization of technology, and free-response writing. This course requires a strong mathematical background and moves at an accelerated pace. This course can count for the STEM graduation requirement. Course fee will not exceed \$3.00.
