

Speaking and Writing

Task 1: Read and discuss

Work in pairs for task one. Chose a word from the words given below and describe it without saying the word. Explain the word so that it is easy for your partner to guess it. Take turns.

	ambulance	bone	doctor
pill		blood	blood test
	drug		
penicillin		waiting room	
	burn	nurse	
			wound
scientist		heart	
	brain		hospital

Task 2: Group Discussion

Have you ever been really ill, hurt or taken to hospital in an ambulance? Have you ever had a surgery or stayed overnight in a hospital? Are you afraid of blood and needles? How much? Are you afraid so much that you would do anything to avoid hospitals? Tell each other about a personal medical experience or about something that has happened to somebody you know.
