Tips:

A flat surface is necessary for consistent ink application.

You will want to save some plastic containers for mixing inks to your liking.

Keep a bucket of water close by with a towel to rinse off hands.

Have a place to put your wet prints as you print them, like a drying rack, clothes line, or wide table.

Don't let the ink dry on the screen. Wash the screen immediately after use and be thorough. Spraying the screen can cause splashes.
