

Privacy Policy

NameMe | Effective Date: March 6, 2026

1. Overview

This Privacy Policy describes how NameMe ("we," "our," or "the app") handles your information. NameMe is designed with your privacy as a core principle: the app works fully offline and stores all data exclusively on your device.

2. Information We Collect

We Do Not Collect Any Personal Information

NameMe does not collect, transmit, or share any personal information. Specifically:

- No account registration or login is required.
- No personal data is sent to any server or third party.
- No analytics, crash reporting, or usage tracking is performed.
- No internet connection is required or used by the app.

Data You Enter

Any data you enter into NameMe — including names, tags, descriptions, and other content — is stored solely on your device using local storage. This data never leaves your device unless you explicitly choose to export or back it up.

3. Offline-First Design

NameMe is built to work entirely without an internet connection. The app does not make network requests and does not require Wi-Fi or mobile data to function. All features are available offline at all times.

4. Data Storage & Security

All app data is stored locally on your device using the operating system's standard storage mechanisms. Your data is subject to your device's own security features, including screen lock, encryption, and access controls. We recommend keeping your device's operating system up to date to benefit from the latest security protections.

5. Backup & Restore

NameMe may offer a backup and restore feature that allows you to export your data to a file or import data from a previously exported file. This export is performed entirely by you and is stored in a location you choose (such as your device's local storage or a cloud drive you control). We have no access to any exported files.

6. Third-Party Services

NameMe does not integrate with any third-party services, SDKs, or advertising networks. No third party has access to your data through this app.

7. Children's Privacy

NameMe does not knowingly collect any information from anyone, including children under the age of 13. Because no data is collected at all, the app is safe for use by anyone.

8. Changes to This Policy

We may update this Privacy Policy from time to time. Any changes will be reflected with an updated effective date within the app. Continued use of the app after changes constitutes your acceptance of the revised policy.

9. Contact Us

If you have any questions or concerns about this Privacy Policy, please feel free to reach out. As there is no data collection, most privacy concerns will not apply, but we are happy to clarify anything about how NameMe works.
