# Canvas Setting Up Parent Access

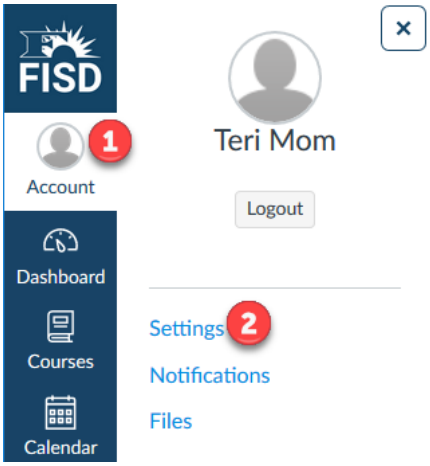

As a parent you can access course content, but not participate in the course.

| | |
|---|---|
| Go to https://fisd.instructure.com.<br><br>To complete these steps, your student will first need to generate a Pairing Code using these instructions. | Click on **Canvas access for parents**<br> |
| Click on **Create a Parent Account**<br> | Create the Parent Account and use the Pairing Code that was generated by the student.<br> |

To log into your account in the future, your Username will be your email address and the password will be the one you entered.

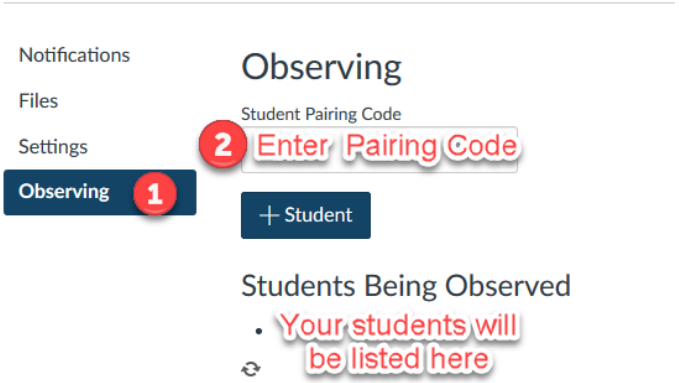

Once you are logged in, click on Dashboard to see your student's classes.

To add additional students on the campuses using Canvas, click on **Account** and then **Settings**

Click on **Observing** and then enter the pairing code from your other student.

The students you are synced with will be listed on this screen.

One of the first things a parent will want to do after setting up their Observer role is to configure their Canvas account to send text and email notifications to be notified of grades and announcements plus other activities in Canvas. To learn about Canvas Notifications visit How to Set Up My Notifications as an Observer.

There is a Canvas Parent App available in Google Play for Android devices and in the App Store for Apple devices.
