

Sweet Bonanza – Slot Review and Ultimate Cheat Sheet

References to sweet bonanza slots can be found in many casino news articles. This is because this game became popular.

Why is this slot so popular among players? Let's dig up Sweet Bonanza's story and find out why it attracted the attention of many gamblers around the world.

Sweet Bonanza – How to Become Popular

Sweet Bonanza is a product of the Pragmatic play released in 2019. Before explaining the game, it is necessary to mention that Pragmatic play is one of the best known providers of iGaming solutions. It creates content, which is used in many online casinos around the world. Due to its high RTP, reliability, and amazing visual components, the company's slot machines are often the player's best choice. The Sweet Bonanza market review is proof of this.

Sweet Bonanza also has all these features and even some additional features, which makes it much better than its previous games. The game provider decided to go further in this game and added even more innovation to it. Pragmatic play knows how to successfully market a product, attracts a lot of customers, and an innovative approach is not the last word here.

The release of the game has attracted the attention of many players who are experts in this kind of casino game. The following is a list of the advantages of slots that have become popular:

Medium volatility (although the supplier sells it as a highly distributed game) – the golden mean between a rare big win and a small win;

Many opportunities to customize gameplay – players can use features such as autospin, quickspin, or turbospin;

Amazing graphics and sound – Keep in mind that Sweet Bonanza is a video slot. Therefore, players will not be disappointed with animation and visuals;

You can use games on every device, including personal computers, tablets, and, of course, smartphones;

One of the innovative features is the tumbling function, which is based on the principle of cascading reels, which is used when a winning combo is replaced with a new symbol after it has disappeared.

Thanks to this strength, Sweet Bonanza slots have become popular not only among customers but also among operators.

DolceVita: Sweet Bonanza's design and gameplay

As mentioned above, the video slot has a nice visual element that prevents the player from staying indifferent. Juicy fruits along with lollipops and jelly, which are savory sweets, catch everyone's eyes. In the background, players will see ice cream and soft marshmallow clouds. The game has colorful and eye-pleasing animation.

The slot has a 6x5 grid full of fruit and candy and 20 paylines. Betting starts at \$0.20 and goes up to \$125 per turn. Every colorful symbol has value, which means how much the customer can benefit from it. For example, a banana (maximum share allowed) can reward a user with a sum of \$25 to \$200. The most generous symbol is the apple – it gives the player \$100 to \$1000. Sweets are highly paid items. For example, the most expensive symbol, the red strawberry candy, allows users to win \$5,000. Those who want to play the sweet Bonanza slot don't get free access to all these winning opportunities, but even small bets can lead to fun prizes. [파칭코](#)

The game mechanics are basic. The player turns the reel and waits for the winning combo to appear. When it appears, it activates a tumbling function that generates new symbols on the grid. To enable free spin, the user must collect at least four scattering symbols together. In addition to the free spin, players can also benefit from a wide range of madness multipliers that can increase their stakes by 21175 times.

When talking about other slot features that significantly improve the game except for the cascade feature, it's important to mention the antenna feature. This allows players to increase their bets by 25 cents and gain additional scattering symbols, which may give them more opportunities to gain free rotation. In addition, the Sweet Bonanza game is not the only product of the Fragmutist play with this feature. It's also prevalent in other games.

The RTP in the slot is 96.49%, slightly higher than the average rate.
