

The other Big Bang

In the year 2030, a great explosion generated a series of waves which strongly hit the surroundings of the town of, Small houses which could not withstand the impact of those waves ended with an imminent collapse leaving hundreds of people homeless and injured due to the strong impact of them.

These waves generated many misfortunes in a perimeter around 100 square meters, but also gave a boost to those farmers who had their houses destroyed. When they saw their houses destroyed, some of the farmers emigrated to the big city and started leading another lifestyle. But others preferred to stay in the countryside even without a proper home.
