The old camera had a hard time changing position / rotation (and limits) in the scope of 1 animation scene, but now we have added more features and you can see how during the threesome animation the camera changes its transform a couple of times when the player is standing up, lying down on the ground etc.
- Improved the archer AI's detection, could be seen during the Herbs question task - "Burn the Ships" target
- Updated the dev save to load the latest Alvilda quest in Skadiland

- Increased the time you have to find Hilde in the waters from 15 seconds to 20. Fixed a bug that kept you stuck in a loop if you exited the dialogues of the animation scene after you save Hilde.
- Trigger cum particles from dialogues - could be seen in the new threesome scene. The particle system will be further improved to simulate female's orgasm and give the user option to start it as much as they'd like.
- Added more models to Hertha's farm and Sigrid's cabin. Next we are bringing up the blacksmith area and slave market.
- Fixed a bug with Sigrid not appearing after the sex scene with Hilde or if you exit it before finishing the dialogues.
