

Katto ToS & Privacy Policy (nyaa~~)

Last updated: 15th December 2024 @ 03:29am GMT+0
Thank you for using Katto! <3 :3 As a little introduction for those who don't know, katto is an LGBTQ+-based bot but welcomes everyone!! This document goes through the ToS and Privacy Policy of the bot!

Thanks <3

Privacy Policy

Katto only stores required data such as features (which are coming soon) like user profiles with XP and levels! Or with the administrator commands used by the owner of the bot to debug and troubleshoot issues. This includes logging of commands executed (without specifics, mainly for error logging), and when the bot joins a guild for statistical reasons. This information is sent to a channel in the support server and can be deleted upon request.

The bot has the function to broadcast a message to all guilds, this will only ever be used in the case of the bot being shut down (as an example) or an important notification is required, for example a massive change of functionality (which is incredibly unlikely).

We do not store sensitive information or personal information at all, and **we do not have any premium, or paid-for services or products**, we want the bot to be fun not a paid-for service. Katto is purely an entertainment bot and will not have many server utilities.

We only store specific data such as a guild's ID, and two JSON columns for the following data:

- Bot settings and configuration (when said feature is released), so that server owners and administrators can change what the bot can do in that specific server. For example disabling all image commands, or all fun commands or to specific channels only.
- Server owners to be able to set administrators, or "bot controllers" who can change that server's configuration settings except from the administrators list.
- Boolean value if the server is blacklisted

There is other data we store for users, and is as follows:

- The user ID
- Boolean value if the user is blacklisted
- JSON column for any future features that may be added such as "xp" or "number of commands run".

When our new user profiles feature is completed users will have the option to opt-out of the feature and it will be limited to if the user is blacklisted or not. By using the bot you agree to this privacy policy and the Terms and Conditions of the bot.

Terms of Service

Katto is strictly SFW (Safe for work) bot only, and will not accept misuse of the bot. Anyone caught doing so will be blacklisted from the bot, and the bot may be forced to leave said server and blacklisted from joining said server.

For our image commands, we fetch images from reddit, and have specified SFW only! If any errors occur please **tell us immediately in the support server** so this can be fixed.

When the bot is invited to a server, and we get a “new join” notification, if we find that your server is NSFW we will force the bot to leave your server and it will be blacklisted and this is considered a permanent ban and will not be undone.
