NAPLAN - IMPORTANT INFORMATION

Hello Year 9,

NAPLAN starts next week. These tests all take place on computers via a special program. If you have your own Windows or Apple laptop, you will need to download the relevant file and install the program on your computer.

If you have anything other than a windows or apple laptop, you will need to use a school device.

Below you will find links to the two installers for the NAPLAN lockdown browser. Please click the one that matches your operating system and install the program.

If you have any issues, come see myself or Mr Harris in the IT office.

WINDOWS
MAC

Once you have installed the program (or if you know you will need to use a school device) please fill out the following form.
