

Customize Your Affiliate Center: Understanding LinkTrust Affiliate Center Style sheet architecture.

Below is a visual representation of how the LinkTrust system constructs pages for the affiliate center. While there is no user interface from which you can modify this framework, you can customize your page by modifying the attributes of the CSS classes named below. There is some default styling that comes from a master CSS file but the CSS defined by you in your Affiliate Center Page will override the master CSS.

CORE (This includes the main pages of the site: Welcome, My Account, Request Offers, My Offer and Reporting pages)

LOGIN (This includes the page where affiliates can login and/or signup)

REPORTS (This includes all the reports that pop out to a new browser window)

Master CSS (Any class attributes can be overridden by you if you include the class in your Page Customization CSS) Some of the classes are listed below with arrows that indicate what is affected.
