INTRODUCTION (Garamond, 12pt, Bold, Capital Letters)

The purpose of an introduction is to justify the reasons for writing about your topic. Your goal in this section is to introduce the topic to the reader, provide an overview of previous research on the topic, and identify your own hypothesis, research, or study. If you introduce and define key words in your abstract, you need to introduce and define them in this section with Garamond Font, 12 pt, and 1,5 space. All the subheadings in this section should be in Bold, Garamond Font, 12pt, and 1,5 space. The first letter of each word in subheading should be in capital. Introduction consists of *Background of the Study*, *Problems/ Aims*, *Review of Literature* or *Previous Research*, and *Theoretical Framework* (2-3 pages). From INTRODUCTION to CONCLUSION it should be **3000 – 7000 words** or 10-25 pages.

First Sub heading: *Garamond, 12, Bold, italic, justify, sentence case*

Second sub heading : Garamond, 12, italic, justify, sentence case

METHODS (Garamond, 12pt, Bold, Capital Letters)

This section explains the rationale for the application of specific procedures or **techniques** used to identify, select, and analyze information applied to understand the research problem/project, thereby, allow the readers to critically evaluate your project's/study's overall validity and reliability.

All the subheadings in this section should be in Garamond Font, 12 pt, and 1,5 space. The first letter of each word in subheading should be in capital letter. There is no methodology for non research paper.

RESULT AND DISCUSSION (Garamond, 12pt, Bold, Capital Letters)

The discussion is written to interpret and describe the significance of your findings in light of what was already known about the issues being investigated, and to explain any new understanding or insights about the problem after you have taken the findings into consideration. It should connect to the introduction by way of the research questions or hypotheses you posed and the literature you reviewed, but it does not simply repeat or rearrange the introduction; this section should always explain how your study has moved the reader's understanding of the research problem forward from where you left them at the end of the introduction.

The research findings in the form of research data are further discussed or critically interpreted with particular relevant theoretical approach. Data can also be supported with the presentation of tables, images, etc. Captions for table is written above it with sequenced numbering so that it can be easily referred to, though not put under the pointing sentence/ paragraph. Line (border) to the table is made minimalist by eliminating the vertical lines and leaving horizontal lines deemed necessary. Captions for images are placed below the picture, also with providing sequenced numbering. One page only accommodates a table or an image with a maximum of two-thirds the size of the page (size adjusted as efficiently as possible).
