x-art_catie_listen_to_me_cum_1080

A band release an album in which each track contains a subliminal/subsonic/magical frequency which causes arousal in the listener.

Listening to just one track causes mild arousal and pleasant euphoria, so hearing it on the radio has no big impact other than causing the audience to feel good and like the song.

Listening to more tracks in a row, or just one track on repeat, increases the effect.

Two tracks brings strong arousal and difficulty in concentrating on anything else.

Three tracks lowers inhibitions and starts a feeling of compulsion to masturbate.

Four tracks removes most inhibitions entirely and the compulsion to masturbate becomes very strong.

Five tracks, anyone not restrained is masturbating wildly now with no regard to the propriety of their situation, and making use of any objects nearby as sex-toys. That includes bedknobs, door handles, cans, bottles, torches. They have a strong need to fuck themselves with anything they can lay hand on. Anyone forcibly restrained from masturbating is starting to feel phantom stimulation of all their erogenous zones.

Six tracks, the spontaneous orgasms begin. Cocks erupt with fountains of cum, pussies gush and squirt copiously. Orgasms continue one after another, expending all available sexual fluids and then onwards in a dry state until the listener blacks out from over stimulation.

The effect is lessened or delayed when hearing the music from a distance, or muffled by walls. For example, a brother and sister have adjacent bedrooms, the brother is playing the music in his room, and the sister is hearing it only faintly through the wall. The effect on her will be one or two tracks behind what's happening to her brother.

I am from an alternate universe where nano-technology is commonplace.
Nano-machines 'living' in the bloodstream can affect changes to the physical body.

With this technology, humans have been able to craft themselves into anthropomorphic animal shapes, and can even shift form between anthro and animal shape.

That technology also allows the user to manipulate their own body for expanded sexual activities.

Fuzzy is male, but can grow breasts and change between multiple different genital configurations at will.

Changes can be consciously directed, but there is a default sequence that occurs if no effort is made to do otherwise.

Fuzzy's default sequence is as follows:

When becoming aroused, breasts begin to develop and enlarge at a similar rate to that of the penis becoming erect.

At full erection, breasts are a perky B-cup.

Breast stimulation can induce breast orgasm.

During breast orgasm a special fluid spurts from the nipples.

That fluid contains nano-machines which are programmed to interact with and modify the body of whoever they come into contact with.

If they come into contact with me, they trigger a genital transformation. Testicles disappear and scrotum splits to become labia. Vagina develops, but womb and ovaries are not present. Penis shaft retracts leaving glans of penis in position of clitoris.

If they come into contact with my sexual partner, they trigger a different genital transformation.

If my partner has traditional male genitals, then their testicles and scrotum morph into a second penis which begins to seep a lubricating fluid in preparation for anal intercourse.

If my partner has traditional female genitals, then first one penis is formed in a sequence that is the reverse of what happens to me, and then a second penis is developed as per the male genital transformation.

In all cases the breast fluid also acts as a powerful aphrodisiac.

Phermonones?

If it has been more than 2 hours since my last orgasm I start to give off pheromones that induce arousal in everyone near me. The arousal increases with continued exposure.

Once an affected individual orgasms, the effect drops and begins to build again.

First half hour people just start to feel horny, get erections etc.

Next half hour, very aroused, rock hard erections, seriously wet panties etc.

Second hour, they find it hard to think about anything except how desperate they feel. Most will feel compelled to start masturbating now or getting it on with one another.

Third hour, erogenous zones become so sensitive that the smallest stimulation triggers powerful orgasms.

Fourth hour, if the effected individual has managed to avoid orgasm up to this point, spontaneous orgasm occurs.

Due to this effect, it's important that I take a break every 2 hours to have another orgasm if I want to maintain a calm environment, or not stay around the same people for more than an hour or so.

Werebeast transformation through orgasm. Orgasm triggers transformation in either direction.

Late blooming orphan teenage boy, reaches 18 without much sign of puberty.
Daily masturbation habit. Wanks before sleep every night.

After 18th birthday starts feeling extra horny, having especially intense orgasms including tingling skin, facial twitches, itching ears.

Starts to notice signs of puberty. Deepened voice, increased body hair. Strangely these traits seem to come and go from one day to the next.

Approaching one month since birthday, starts to experience very strong erections during class at school. And starts having to seek release in the toilets at lunch time.
Now voice and body hair come and go during the day.

Exactly one month since birthday, wakes up feeling very out of sorts. Muscles aching, running an extreme temperature, thoughts hazy.
Morning Wood is unusually hard and doesn't go down after pissing.
Stays home from school due to flu symptoms.

Lying in bed with hardest erection ever, hazy thoughts drift into sexual fantasies. Arousal builds all day but he cannot reach orgasm. Tries all sorts of techniques but nothing works.

Late in the afternoon he collapses onto his bed, delirious with lust, cock red and raw from his attempts to satisfy himself.

As the sun sets and the full moon begins to peek over the horizon, his erection begins to pulse as it becomes even harder than before.

His whole body starts tingling, muscles tense up, back arching up off the bed, facial muscles spasming uncontrollably. Face contorted into a shocking grimace.

As the moon clears the horizon his orgasm strikes like a <insert really powerful thing here>. Jet after jet of cum erupts from his cock. He claws at the sheets of the bed in the throes of his passion.

A roar is ripped from his throat while his face transforms and fur sprouts all over his body.

As his muscles relax and he falls back onto the bed he feels an uncomfortable lump in the bed under his bum.

Rolling sideways off the lump he catches sight of himself in the mirror and is shocked to discover that he has transformed into a werebeast!

2. Girl finds tome of magic spells. Spells are prepared by inscribing runes/symbols and speaking verses of power. Spells are actually activated through orgasm.

Activation instructions are somewhat convoluted so the girl doesn't know it is done by orgasm.

She tries a spell but it doesn't seem to work. The verses of power spark arousal in her. It builds and builds.

She can't hold back for long and is soon furiously masturbating to an incredible orgasm.

Little does she know that this has activated the spell that she had tried to cast, but soon enough she finds out.

"Jess, are you okay?" my mother inquired "You seem a bit distracted and you've hardly touched your dinner."

"I'm fine, Mum, just a bit tired is all" I replied, squeezing my thighs together and trying not to squirm as my clit continued to pulse, demanding my attention.

The truth is, I was far from fine. I was so aroused that it was all I could do not to jam my hand down my pants and start masturbating right there at the dining table.

"May I be excused?" I asked, "I'm just so tired, I think I'll go to bed early tonight."

"You've already done your homework for the night, haven't you?" Dad confirmed, "You go and get some rest and hopefully you'll feel better tomorrow, darling."

Getting up from my chair I managed to back out of the room without turning around so my parents wouldn't see the wet spot that had formed on the back of my skirt. My panties were soaked through and every step I took set them sliding deliciously against my throbbing pussy.

Reaching my room I closed and locked the door before whipping my panties off and plunging three fingers deep into my hungry cunt.

I didn't even make it as far as my bed, collapsing to my knees on the floor as I worked my

pussy, pumping my fingers in and out while grinding my clit under my thumb.

Images of Dan as my love slave, worshiping my body with his hands and mouth and cock cascaded through my mind.

My hips writhed against my desperate hand. My back arched as I clutched my breast with my other hand, pinching and twisting my nipple through the fabric of my school shirt and sports bra.

My orgasm was upon me. Pussy, arse and hips spasming as my fingers mashed into my g-spot. Jolts of pleasure shot like lightning bolts between my clit and my nipples. A gushing release as something in my groin contracted and my juices sprayed out, soaking my hand and the floor in front of me.

Panting to get my breath back I was just about to start cleaning myself up when my phone rang.

It showed a number, not a name, so it wasn't someone from my contact list.

"Hello?" I answered, still breathing hard from my exertions.

"Uh, hi! Is that Jessica?" the male voice asked. "This is Dan, we're in the same computer science class at school."

"Oh, hi Dan, yes, this is Jess, I wasn't expecting a call from you! I didn't even know you had my number!" I responded, wondering at the coincidental timing of his call.

"Yeah, umm, it took a bit of asking around to get ahold of it. You don't have a lot of friends and they're not exactly the type I'd normally want to be seen talking to." Dan explained sheepishly. I could almost hear his cheeks reddening.

"So, why go to all the effort of tracking down my number? I suppose you're having trouble with the assignment and you thought you'd ask the nerdiest girl in class to help you out?" I returned bitterly.

"No! Well, yes, but no. I am having some trouble with the assignment, but actually, I was calling because I wanted to ask you out. I don't know why I never noticed before, but this afternoon I just realised you're the most attractive girl I've ever met. I can't stop thinking about you and I really want to get to know you better. Do you have plans for Friday night? We could see a movie, or go to a concert, or, or, whatever you want to do! Please! Just say you'll go out with me!" He gibbered.

"It worked!" I almost shouted, "Uh, I mean, that'll work." I replied. "I've been wanting to see that new Transformers live action movie. I've heard it's not as good as the cartoons were but I still want to check it out and decide for myself."

3. Another girl brought up by strict parents who teach her that anything sexual is evil. For many years she believes and stays innocent. Eventually she is convinced otherwise by a friend. She experiments with touching her body. Each orgasm that she has transforms her a little bit more into a succubus. She realises fairly early on that she is being changed, but she can't resist.

4. A boy with psychic powers that become active when he is aroused. One day in class he's daydreaming about his sexy young teacher. Gazing at her chest he imagines what her breasts would look like if she was topless. As he continues to stare, fantasizing about fondling and caressing them, he notices that her nipples have become erect enough that he can see their shape through her blouse and bra. He doesn't know it, but the teacher has been feeling each imagined touch and caress as though he was really doing what he had been fantasizing about. She gets flustered and has trouble keeping her mind on the lesson that she's teaching, but the class was almost over, so her change in manner isn't really obvious to anyone. Another time he's travelling on the train and starts fantasizing about the hot girl sitting across from him. As his fantasy progresses from fondling her breasts onward into massaging her pussy and sucking on her clit, she seems to get very restless and fidgety, squirming in her seat, her face flushing as she feels everything he imagines. As he imagines sucking hard on her clit and massaging her G-spot, her breathing becomes ragged and she shudders uncontrollably, trying to keep quiet as her orgasm crashes through her in this very public place. There is a limit to his power though. Once he realises the effect he can have on people he starts experimenting with it and discovers that he must be able to see the person for it to work, and it stops working as soon as he orgasms.

5. Samantha, best friend of Jess (#2), has been having problems w

Alternative to the girl with the tome:

A natural born orgasmancer, discovers her powers when she first discovers masturbation and orgasm.

Casts spells by fixing the desired result in her mind and then masturbating to orgasm to cast it. Requires line of sight on target, so she ends up having to do a lot of masturbation in public, trying not to get caught.

Perhaps decides to employ a remote controlled vibrator to keep her arousal up for quicker

casting in times of need.

She also discovers that she can have squirting orgasms, in which case the spell is imbued into the ejaculated fluid instead of being cast immediately and can be stored for later use as a sort of potion.

Alice in wonderland sexual re-write.

Re-write selected scenes from the books, leaving as much as possible of the original text intact, but replace certain words or phrases to twist the scene into something sexual.

For example, the Mad Hatter's Tea Party:

"Have some more orgasms" the March Hare said to Alice, very earnestly.

"I've had none yet," Alice replied in an offended tone, "so I can't have more."

"You mean you can't have less," said the Hatter: "it's very easy to have more than nothing."

Sexy Zombies

Infection spread through bodily fluids. Very infectious, even saliva will transfer it easily.

The infection is only contagious in Stage 2 though, meaning a newly infected victim cannot spread the disease to others.

Once infected, the victim starts to become aroused.

Arousal will continue to build and erogenous zones become increasingly sensitive.

As the effect continues to intensify, the victim tends to seek sexual release either with a partner or through masturbation.

In victims who resist the compulsion to seek sexual release, the buildup of arousal, and ever increasing sensitivity of erogenous zones tends to result in spontaneous orgasm triggered by the slightest touch to erogenous zones. Even the normally unnoticed touch of clothing against skin can be enough to set them off.

No matter how it is achieved, orgasm signals the end of Stage 1 of the infection.

This orgasm is so intense, and long lasting that the victim invariably dies screaming in ecstasy.

Generally their lungs give out first, from the screaming and panting. Once the lungs stop working, the victim faints from lack of oxygen and the heart stops soon afterwards.

In some cases the heart gives out first, but whatever the cause, death is always the result of this ultimate orgasm.

The victim does not remain dead though. Within less than a minute of their death, the victim

seems to return to life.

They are not alive in the technical sense of the word in that their heart no longer beats, and they do not breathe automatically, but they do regain the semblance of life. Being able to move around and sense and react to the environment around them.

This re-animation marks the start of Stage 2 of the disease.

The re-animated corpse is now contagious and can spread the disease through contact of bodily fluids upon vulnerable areas of a living human. Examples include spitting in someone's eye, kissing them on the mouth, ejaculating inside them, or bleeding on an open wound.

The Stage 2 infected victim, or zombie and they are commonly called, retains their personality and memories from life, but are now driven by different priorities than when they were alive.

Zombies are in a constant state of extreme arousal, leading to involuntary moaning and groaning.

They tend to ooze bodily fluids. Constantly drooling and leaking lubrication from their genitals. It is a frustrated state though, since nothing they do to themselves, or with other zombies can bring them to orgasm.

The response of their sensory nerves is also altered when they become zombies. They no longer feel pain.

Any sensation that would previously have registered as pain now yields pleasure instead.

Being cut, beaten or even dismembered only serves to excite them and increase their arousal, although it cannot bring them to orgasm.

The only way they can cum is through stimulation while in contact with the bodily fluids of a living human.

This is why the zombies make such an effort to pursue the living humans.

The contact and stimulation can take many varied forms, from the immediately obvious ways such as sexual intercourse with a living human (willing or otherwise, although even if it starts out as rape, the human generally gets infected quickly, and they tend to become willing and even enthusiastic within minutes.), or masturbating while performing oral sex on a human, all the way through to more strange and disturbing situations such as rubbing vigorously against a wounded and bleeding human, or getting human fluids into open wounds on the zombie (anything from peeing or puking on a sliced up zombie, to dismemberment and wound-fucking, if there are any humans around who are perverted enough to do that.)

When a zombie reaches orgasm, there is an explosion of bodily fluids. A male will ejaculate litres of cum and females will squirt almost as much fluid as the males as well as spraying milk from their breasts.

Any open wounds will spurt blood copiously too.

This almost guarantees that anyone near an orgasming zombie will be exposed to their fluids and subsequently infected.

Directly after orgasm, the zombie will seem to recover their sanity and act more like the person they were in life.

This period of clarity lasts only for a few minutes though and the extreme arousal soon returns. Driving them to again seek contact with living humans.
