

Premiere is not reading the correct "date created" metadata on certain video files (in this example, a GoPro hero 9 (even when it shows the correct date/time created in finder on a Mac).

How to reproduce:

1. On a Mac computer, download zip file with video files from [Google Drive link](#). Double click on zip file to extract video files.
2. Open extracted folder. If you don't see date created, right click on menu and select "date created".

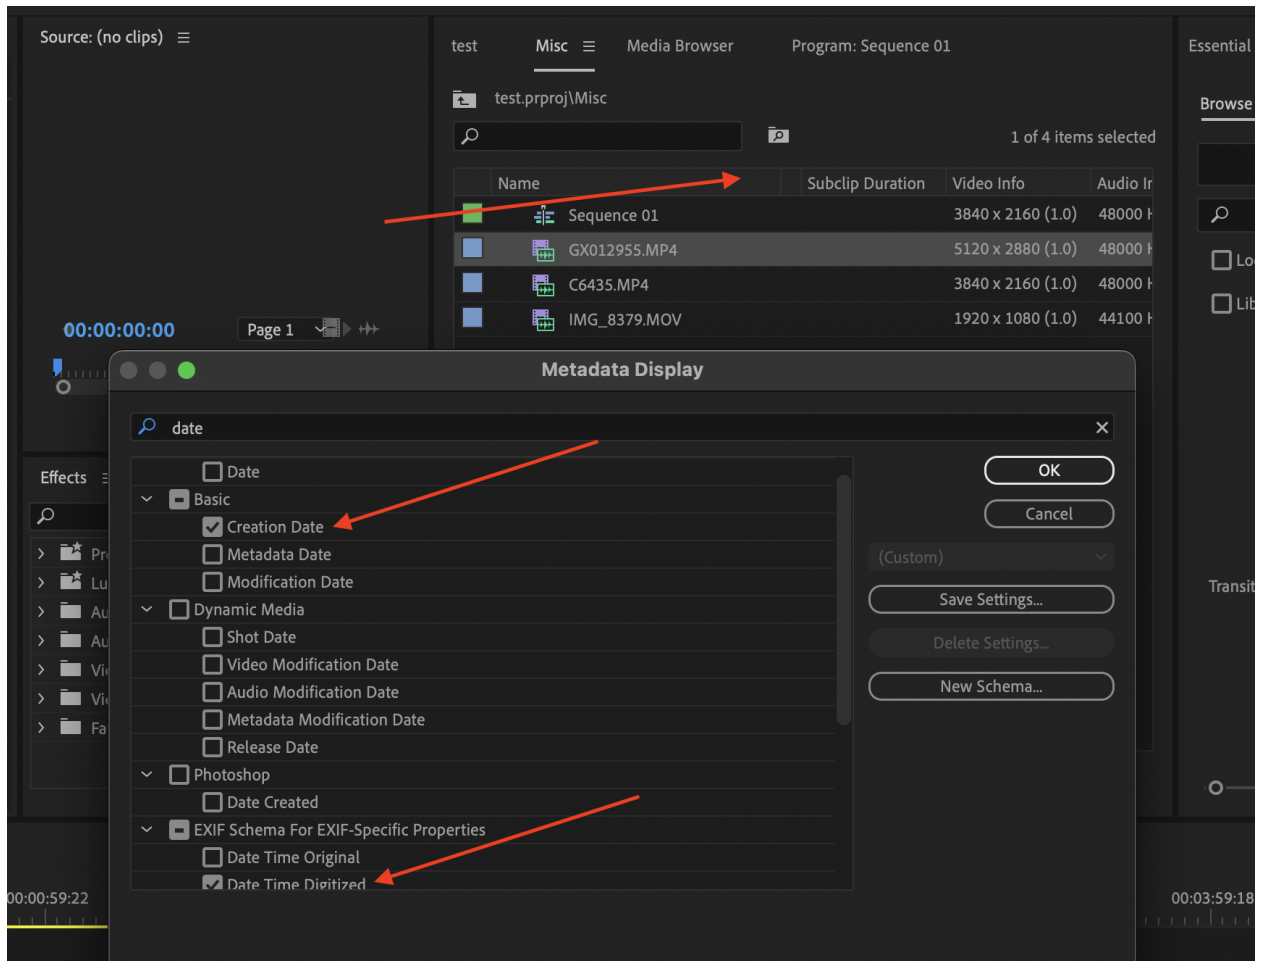

3. In Finder Click on date created to sort by date created. You will see that file name C6435.MP4 (A7siii) was created on March 17th at 11:39AM. IMG_8379 (iphone video) was created on March 17th at 2:12PM and GX012955 (GoPro Hero9) was created March 17th at 2:24PM.

The screenshot shows a Finder window titled "date created metadata 2" with files sorted by "Date Created". The table below represents the data shown in the window.

Name	Date Modified	Date Created	Size	Kind
C6435.MP4	Mar 17, 2023 at 11:39 AM	Mar 17, 2023 at 11:39 AM	604.3 MB	MPEG-4 movie
IMG_8379.MOV	Mar 17, 2023 at 2:12 PM	Mar 17, 2023 at 2:12 PM	60.3 MB	QT movie
GX012955.MP4	Mar 17, 2023 at 2:24 PM	Mar 17, 2023 at 2:24 PM	885.9 MB	MPEG-4 movie

4. In Premiere, open and create a new project and Import these video files you downloaded from Drive into Premiere. In the bin where the files are, Right click menu in list view and select metadata display. Search for and choose "Creation date" and "Date Time Digitized". Click OK and sort by date created(see below image).

- 5.
6. add "creation date" and "date/time digitized" under metadata display. See if the meta data creation date matches what finder shows. It doesn't. Sort by "Creation Date" and notice that file C6435 now has incorrect metadata date/time of March 17th at 12:38PM, IMG_8379 shows correct date/time of 2:12PM and GX012955 now shows incorrect creation date as 10:23AM instead of 2:24PM.

Name	Creation Date	Date Time Digitized
Sequence 01		
GX012955.MP4	Mar 17, 2023 at 10:23:29 AM	Mar 17, 2023 at 10:23:29...
C6435.MP4	Mar 17, 2023 at 12:38:34 PM	Mar 17, 2023 at 12:38:34...
IMG_8379.MOV	Mar 17, 2023 at 2:12:38 PM	Mar 17, 2023 at 2:12:38 ...

I would like to be able to sort all video files by the date created and have them listed in order of date/time created chronologically. Also, we need to be sure they are not grouped by device. If I put, phone videos, gopro videos and A7siii videos in a bin and choose "creation date", it should list them chronological based on date/time.

Mac M1 Max (Ventura 13.2.1)

Premiere Pro 23.2.0

Sony A7siii 422 10 bit

Gopro Hero 9

Gopro Hero 11

You can also watch [this video](#) to see how the metadata is being displayed **correctly** in Davinci Resolve and Final Cut Pro allowing you to sort by date/time created. Premiere currently is changing metadata on import which does not give me the ability to accurately sort by creation date.
