Generate style.css file for your website

Advanced

Custom CSS file generator

This interface gives you an ability to reduce CSS file size by reducing amount of code loaded on each page. Just untick all features, options and plugins that you will not use and this CSS code will not be loaded. You can make your CSS file up to 50% smaller and it depends on a number of options and features you use.

Theme version:	4.1.0

DELETE

This section allows you to generate a custom CSS file based on our core theme styles. It means that you can reduce your CSS file size if you are not using some part of the functionality. Useful for performance and loading time optimization.
