Abstract

The abstract should be written as a single paragraph summarizing the entire paper concisely. It must clearly present the background, objective, methodology, key results, and conclusion or implications of the study. Avoid using subheadings, citations, or abbreviations that are not widely known. The text should be written in past tense for completed research and third-person form, without references or footnotes. Authors are encouraged to highlight the novelty and contribution of their work to the field of connected learning, smart systems, or educational innovation. The abstract should be limited to no more than **250 words, 11 pt font size**, and single line spacing.

Keywords: *component, formatting, style, styling, insert (key words)*

Program/Research Description

Describe the background and rationale of the program or research. Explain the main issue being addressed, its relevance to the Connected Learning Summit theme, and the objectives or expected contributions. Include context such as institution, community, or system, and the motivation behind the implementation or research.

Technical Implementation or Methodology

Explain the technical or methodological approach used. Describe the implementation process, research design, tools or technologies involved, and participants or target groups. Include steps, workflow, and methods of data collection or evaluation, if applicable.

Tips: Use diagrams, figures, or flowcharts to illustrate processes or system architecture when relevant.

Impact or Final Results of the Program/Research

Present the outcomes and impacts of the work. Include quantitative findings (data, indicators) or qualitative outcomes (behavioral change, innovation, policy implications, user feedback).

Highlight the significance of the results in advancing connected learning, digital transformation, or educational innovation.

Tips: Emphasize lessons learned, key insights, and potential for scalability or replication.
