

RIP9-RocketMQ Developer Guide

Status

- Current State: Proposed
- Authors: wllqipeng
- Shepherds: dinglei(dinglei@apache.org)
- Mailing List discussion: users@rocketmq.apache.org;dev@rocketmq.apache.org
- Pull Request:<https://github.com/apache/rocketmq/pull/659>
- Released: <4.4.1>

Background & Motivation

What do we need to do

For RocketMQ users, the developer guide is undoubtedly very important. It can help developers quickly learn how to use rocketmq. So we're going to write a developer guide for RocketMQ.

Goals

- What problem is this proposal designed to solve?

We plan to provide RocketMQ developer guide, including concepts, architecture, functional features, design, samples, best practices, operations and maintenance management.

- To what degree should we solve the problem?
 - 1) Give developers a better understanding of the architecture and principles of RocketMQ.
 - 2) Introduce RocketMQ best practices to developers.

Non-Goals

- Are there any limits of this proposal?

Developer's Guide only supports Chinese and English

Changes

We will add a new module named *docs*, which includes cn and en.
