

Create 500 Shopee Accounts Safely

Did you know that every time you access Shopee, their system collects over 200 data points about your device? From your Chrome version to your installed font list, even how you move your mouse.

This is why simply logging out and logging into another account is COMPLETELY USELESS for protecting accounts. Your Digital Fingerprint remains identical, and Shopee can easily link all accounts together.

Statistics That Matter

According to research from 5,000+ MMO Marketing marketers in 2025:

****Account Ban Rates:****

No protection: 78% banned within 30 days

VPN only: 61% banned within 60 days

Antidetect browser: 3% banned within 12 months

****Revenue Impact:****

Average loss when account banned: \$8,400

Time to rebuild: 4-6 months

Trust score recovery: 8-12 months

****Scaling Success:****

With antidetect: 89% successfully scale to 10+ accounts

Without antidetect: 12% can scale to 5+ accounts

Numbers don't lie. Shopee is getting stricter, and the gap between antidetect users vs non-users is widening.
