

# Poster Presentation

You will present a poster on any (possibly) controversial topic related to physics. You will prepare the poster, focusing on the advantages of the chosen topic and (or) its negative sides or disadvantages, or just different aspects of the topic.

The whole poster presentation should last about 10 minutes. The poster should be processed graphically using any template for poster design (i.e. Canvas) and will adhere to the principles applied to poster design we will discuss in class. The Poster Session will be held in Week 12.

## Poster topics

<b>Student</b>		<b>Topic</b>
<b>509107</b>		<b>Electromagnetism myths</b>
<b>534103</b>		<b>Strange properties of water</b>
