SELECTION PROCESS

选择程序

For each ticket to space we own, we will randomly select five candidate astronauts from the NFTs in this collection (each NFT has an equal chance of being selected).

The five selected candidates will go through Blue Origin's review process and when approved we will do a ranked choice vote on Snapshot using \$MOONEY. If for whatever reason the chosen astronaut cannot go, then we will go down the list and choose the next highest ranked person.

We will include some "consolation rewards" for those that are not selected from the five. The consolation prize will be decided by our community, but for illustrative purposes could include something like flying to any destination of their choosing for them and a +1.

我们将从本次所有已售NFT中随机选择宇航员的候选人(每个出售的NFT被选中的机会均等)。对于我们拥有的每张票, 我们将从所有的票中随机选择5人, 然后用我们的治理代币\$mooney在snap shot上投票选出最终的宇航员。
