## STUDENTS NEED TB TEST and FLU SHOT!

Dear Parents,

August 2020

We have many different Work-Based Learning opportunities at Jardon. Beaumont Hospital and Heritage Park Place Village are worksites that require to have a current **TB test** submitted to school.

Traditionally, the TB tests are considered “good” for 2 years, unless the Location or the Center for Disease Control (CDC) states otherwise. If you would like to wait to have this test done until after we fully return to job sites, we completely understand.

A yearly **Flu Shot** is also required for students volunteering at Beaumont Hospital. Flu shot documentation must be submitted before November 1, 2020 in order for Students to continue there or start a new rotation.

We encourage you to take your young adult to their physician or the Oakland County Health Department (TB test can be done there for \$8.00) and have their TB Test done for the start of the school year and for the first Worksite rotation.

Educationally,  
The Jardon Staff
