INTRODUCTION

Background of the study:

Literature review:

Gap analysis:

Rationale of the study:

Purpose or Hypotheses of the study:

METHOD

Research Design :

Participant :

Population and the methods of sampling Instrumentation (sample of questions, scoring method, and psychometric properties (validity and reliability)) :

Instrument :

Procedures and if relevant, the time frame :

Analysis plan (describe statistical test and the comparisons mode: ordinary statistical methods should be used without comment; advanced or unusual methods may require a literature citation):

Scope and/or limitations of the methodology you used :

Manuscript can use the method for observational studies, SRQR for qualitative studies, PRISMA for reviews, CARE for case reports, CONSORT for clinical trials

RESULTS AND DISCUSSION

Results :
Discussion :
Implications :
Research contribution :
Limitations :
Suggestions :

CONCLUSION

Provide a statement that what is expected, as stated in the "Introduction" chapter can ultimately result in "Results and Discussion" chapter, so there is compatibility. Moreover, it can also be added to the prospect of the development of research results and application prospects of further studies into the next (based on result and discussion).

ACKNOWLEDGMENT

The acknowledgement is a form of appreciation for the contribution of an institution or an individual who is not considered as the writer for example an institution or an individual who provides the research funding (**funding support**) of this publication.

AUTHOR CONTRIBUTION STATEMENT

The Author Contributions Statement can be up to several sentences long and should briefly describe the tasks of individual authors. Please list only 2 initials for each author, without full stops, but separated by commas (e.g. JC, JS). In the case of two authors with the same initials, please use their middle initial to differentiate between them (e.g. REW, RSW). The Author Contributions Statement should be included at the end of the manuscript before the References.

AI DISCLOSURE STATEMENT

The author used [TOOL/SERVICE NAME] during the preparation of this work for [REASON]. After using the tool/service, the author thoroughly reviewed and edited the content as needed and takes full responsibility for the content of the publication.

The authors declare that this research was prepared, researched, written, and edited without the aid of artificial intelligence (AI) techniques.

REFERENCES

The following are the reference writing guidelines of Online Learning in Educational Research. The references should be written to justify alignment and alphabetically. We suggest you use Mendeley management reference with **APA style** for your references. The guideline for example below:
