

Educational options for “Close Contact” child/family:

A. If your child is vaccinated and not showing symptoms they may remain in school with a mask without testing.

B. Have your child quarantine at home for 10 days and monitor siblings closely.

C. Have your child complete the antigen testing in schools with the district nurse. If you choose this option, your child/children will be nasal swabbed (not deep) in the mornings for 10 days. Test results are completed in 15 minutes. If the test results are negative they may stay in school that day wearing a mask until day 10 is complete.

If the antigen testing is positive you will be notified and the child will be referred to you for provider for further testing if the parent chooses. Child/children will wear masks through the 10 day testing process if at school. The tests will only be on school days

D. Your child may attend a quarantine room at school without being tested if:

- The school has 3 or more students currently in the quarantine room for that day.
- The student wears a mask and maintains social distancing during the quarantine
- The student agrees to go directly home after the school quarantine (students are not allowed to attend extracurricular activities during quarantine period)

USD 223 is working with the Kansas Department of Health and Education as well as our County Health Department closely.

If you have any questions, please call the school where your child/children go or send us an email at jtegtmeier@usd223.org klocke@usd223.org or lschmidt@usd223.org
