Feel free to adapt the following texts to meet your needs.

Twitter:

IIoT covers many use cases, industries, and applications - and more and more of them are based on #OpenSource technology like #FIWARE. Do you know which international industries are already applying this approach? Join the #FIWAREIndustryDAY. Register! <https://bit.ly/338LiOS>

Digital technologies have an impact in areas concerning the use of data, computing power, big data, #IoT, machine-to-machine, cloud computing for info centralization, and storage. #FIWARE plays a key role in these scenarios. Join the #FIWAREIndustryDAY! <https://bit.ly/338LiOS>

#FIWARE describes #context as a collection of entities that work as #DigitalTwins of real-world assets, both physical (a turbine, an operator) or conceptual (a claim, an order). These and other topics will be covered in the upcoming #FIWAREIndustryDAY. <https://bit.ly/338LiOS>

Linkedin/Facebook:

Industrie 4.0 is at the center of economic transformation - across the globe. With only 1% of the data collected being used by companies today, e.g. "machine learning" (e.g. machines that improve their performance by "learning" from the data collected and analysed), human-machine interaction or digital twins can unlock an enormous potential of additional use cases and efficiencies. #FIWARE is important for the creation of data spaces for effective data sharing/exchange. Register now for the upcoming #FIWAREIndustryDAY. <https://bit.ly/338LiOS>

The FIWARE smart solution architecture for Smart Industry brings support to decisions and the automation of business processes. In the #FIWAREIndustryDAY many topics will be dealt with combining Smart Industry and Smart Manufacturing, bringing international experts in the field from the European Commission and large international companies on stage.

Real-life use cases from across the globe, from Spain to India, the FIWARE Industry DAY will showcase how FIWARE plays a key role in the creation of data spaces for effective data sharing/exchange, also between organizations traditionally bound to different domains (Smart Manufacturing, Smart Logistics, Smart Ports, Smart Cities, Smart Home) towards the creation of innovative value chains. Register for the upcoming virtual #FIWAREIndustryDAY. <https://bit.ly/338LiOS>
