

Water around my school: Part One

Name: _____

Date: _____

Teacher: _____

Prompt	Response
List all the places around the school where water is available for drinking.	
List all the places around the school where water is used, but not for drinking. You might need to ask the principal, the custodian, or the cafeteria workers for help locating all of the water sources.	
Where is the main water valve for your school? In other words, if the water needed to be shut off to the school, where is that valve located?	
Homework: On the backside, draw a diagram of the outside of your house that shows where the water shut-off valve to your home is.
