

You thinking what I'm thinking?

~~Management~~ Pasta with ketchup meeting 2/7

Attendees

Heldplayer, Juncopartner, MrGreen, SaintK, Scatterbrain, TotallyNotMbl (But it actually was mbl)

Agenda

(copy pasta from junco forums post) So for this meeting:

- Which machine are we moving drives from Mr. White to?
- What resources do we have available using the two remaining machines?
- Is it more than we need anyway?
- What servers can we definitely stand to lose?
- Will there be complications for games or the website?
- Can we effectively fund Mr. White long term? How would we setup recurring payments?

Monthly donations - set it up? Any interest from community?

What else can we do with SpA? Opening ideas up to the community?

~~Meeting~~ Pasta stuff

- [Money, money, money](#)
 - 2 machines cost money
 - 120 euro/month
 - Pay for ipaddress physical space etc.
 - If we can't get donations going, remove one of the machines.
 - Price cut in half.
- State of the machines
 - Slowly dying
 - Mrwhite is 5-6 years old. (VM host)
 - Mrblue keeps crashing out of the blue (badum ts!)
 - Mrblonde is 3-4 years old (VM host)
 - Backups down, so no backups.
 - Surprised we are not hacked, old things.
 - Hardware wearing down.
 - Would not be surprised if something breaks down soon
 - Server are gonna be moved to new datacenter (SCARY!).
 - 50/50 something gonna break.
 - Have to be physically moved

2016-07-02

- Kind of forces into merging the two machines into one.
 - Old mrblonde at saintks house (spare parts)
 - Mrblonde is better performance wise, so if one server is gonna be removed it is gonna be Mrwhite
 - Some talk about what is able to be upgraded
 - Mrblonde full on harddrives, but can move the ssd over.
 - Could buy one big harddrive as harddrives are faster these days.
 - Would have to cut red orchestra and probably something more?
 - Red orchestra hefty load. 2x 64 slot servers.
 - Need to make space available, probably means red orchestra needs to go, frees up resources that are in use.
 - TF2, minecraft and gmod.
 - Minecraft eats rams for breakfast
 - => less ram for other things.
 - When to we move?
 - Latest september the 16th.
 - Guessing beginning of september.
- Minecraft
 - 2 servers at idle
 - Temp map, vanilla, almost no plugins?
 - Build server, new map. Uses more ram, plugins.
 - Eventually 1 server.
 - Using 4gb of ram (Both servers idle)
 - 16gb assigned.
 - Maybe could do with 8gb or 12gb for now?
 - Decided: drop down to 12gb.
- How to do the community building in the future?
 - New games not usually need server hosting.
 - People, centered around mumble/forum.
 -
- Decisions if we merge:
 - Minecraft reduce ram to 12gb (from 16gb)
 - Drop red orchestra
 - TF2
 - Trim down on servers?
 - Keep one mvm servers.
 - Keep one vanilla servers.
 - Empty server not that much issue (so events could remain online)
 - Upcoming changes to quickplay? Junco idling etc.
- Can merge quite alright, merge over funding?
 - (mrwhite could be break forcing the decision)

2016-07-02

- Merge virtual machines.
- Sunday meeting
 - SpA future ideas, use SpA to do stuff
 - Funding
 - Clans
 - LoL
 - CS:GO
 - Overwatch?
 - Discord pro/cons/thoughts
- Voice chat
 - Discord, not hosted.
 - Mumble, hosted.
 - Moving over to new client tricky.
 - Maybe test out discord?
- Management restructure
 - Make it new people friendly hard.
 - Loads of people who know tech.
 - Junco, Scatter, Mbl => top management.
 - Whole management(?) = Techies+ Game manager + Managers.
 - 2015 wasn't great, not much activity.
 - Limited time available. Contactable enough. (If it becomes a problem, then do something)
- SpA members, many of them.
 - Don't check the forum
 - Doing things that aren't "us"
 - Basic expectation levels.
 - Responsibility.
 - How exclusive, have read community guidelines, presence on forums.
 - Bad cycle, less people use forums => less people use forums.
- **We need more shitposters!**
- Write guides on how to do things.
 - In case we all die in a freak accident.
 - Allow access to things.

[60 euros/month]

TL;DR

Servers; Two options, get enough funding to keep both server. Otherwise cut down to only Mrblonde and then drop red orchestra.

2016-07-02

Sunday meeting; Talk things over; SpA future, Funding, Clans, Discord.
Important; We need more shitposters.

2016-07-02

<- not mayo, but really creepy

<- also not mayo

2016-07-02

< - not even bolognaise but also
not mayo mayonnaise on pasta is a sin invented by germans this is why we had brexit

2016-07-02

<-not bolog

2016-07-02

< -spag bol no mayo do

you see the pattern

<- acceptable with spag bol???? Great controversy
